IntroBlue, LLC

Up to \$1,070,000 of Crowd Notes

IntroBlue, LLC dba Intro-Act and Blueshift Research (“IntroBlue”, the "Company," "we," "us", or "our"), is offering up to \$1,070,000 worth of Crowd Notes of the Company (the "Securities"). Purchasers of Securities are sometimes referred to herein as "Purchasers". The minimum target offering is \$25,000 (the "Target Amount"). This Offering is being conducted on a best efforts basis and the Company must reach its Target Amount of \$25,000 by March 22, 2019. The Company is making concurrent offerings under both Regulation CF (the “Offering”) and Regulation D (the "Combined Offerings"). Unless the Company raises at least the Target Amount of \$25,000 under the Regulation CF Offering and a total of \$1,300,000 under the Combined Offerings (the "Closing Amount") by March 22, 2019, no Securities will be sold in this Offering, investment commitments will be cancelled, and committed funds will be returned. Investors who completed the subscription process by March 15, 2019 will be permitted to increase their subscription amount at any time on or before the March 22, 2019 upon Company consent. For the avoidance of doubt, no initial subscriptions from new investors will accepted after March 15, 2019. The Company will accept oversubscriptions in excess of the Target Amount for the Offering up to \$1,070,000 (the "Maximum Amount") on a first come, first served basis. If the Company reaches its Closing Amount prior to March 15, 2019, the Company may conduct the first of multiple closings, provided that the Offering has been posted for 21 days and that investors who have committed funds will be provided notice five business days prior to the close. The minimum amount of Securities that can be purchased is \$1,000 per Purchaser (which may be waived by the Company, in its sole and absolute discretion). The offer made hereby is subject to modification, prior sale and withdrawal at any time.

A crowdfunding investment involves risk. You should not invest any funds in this Offering unless you can afford to lose your entire investment.

In making an investment decision, investors must rely on their own examination of the issuer and the terms of the Offering, including the merits and risks involved. These Securities have not been recommended or approved by any federal or state securities commission or regulatory authority. Furthermore, these authorities have not passed upon the accuracy or adequacy of this document.

The U.S. Securities and Exchange Commission (the “SEC”) does not pass upon the merits of any Securities offered or the terms of the Offering, nor does it pass upon the accuracy or completeness of any Offering document or literature.

These Securities are offered under an exemption from registration; however, the SEC has not made an independent determination that these Securities are exempt from registration.

This disclosure document contains forward-looking statements and information relating to, among other things, the Company, its business plan and strategy, and its industry. These forward-looking statements are based on the beliefs of, assumptions made by, and information currently available to the Company’s management. When used in this disclosure document and the Company Offering materials, the words "estimate", "project", "believe", "anticipate", "intend", "expect", and similar expressions are intended to identify forward-looking statements. These statements reflect management’s current views with respect to future events and are subject to risks and uncertainties that could cause the Company’s action results to differ materially from those contained in the forward-looking statements. Investors are cautioned not to place

undue reliance on these forward-looking statements to reflect events or circumstances after such state or to reflect the occurrence of unanticipated events.

The Company has certified that all of the following statements are TRUE for the Company in connection with this Offering:

- (1) Is organized under, and subject to, the laws of a State or territory of the United States or the District of Columbia;
- (2) Is not subject to the requirement to file reports pursuant to section 13 or section 15(d) of the Securities Exchange Act of 1934 (the "Exchange Act") (15 U.S.C. 78m or 78o(d));
- (3) Is not an investment company, as defined in section 3 of the Investment Company Act of 1940 (15 U.S.C. 80a-3), or excluded from the definition of investment company by section 3(b) or section 3(c) of that Act (15 U.S.C. 80a-3(b) or 80a-3(c));
- (4) Is not ineligible to offer or sell securities in reliance on section 4(a)(6) of the Securities Act of 1933 (the "1933 Act") (15 U.S.C. 77d(a)(6)) as a result of a disqualification as specified in § 227.503(a);
- (5) Has filed with the SEC and provided to investors, to the extent required, any ongoing annual reports required by law during the two years immediately preceding the filing of this Form C; and
- (6) Has a specific business plan, which is not to engage in a merger or acquisition with an unidentified company or companies.

Ongoing Reporting

The Company will file a report electronically with the SEC annually and post the report on its website, no later than April 30, 2019.

Once posted, the annual report may be found on the Company's website at <https://www.intro-act.com/investors>.

The Company must continue to comply with the ongoing reporting requirements until:

- (1) the Company is required to file reports under Section 13(a) or Section 15(d) of the Exchange Act;
- (2) the Company has filed at least three annual reports pursuant to Regulation CF and has total assets that do not exceed \$10,000,000;
- (3) the Company has filed at least one annual report pursuant to Regulation CF and has fewer than 300 holders of record;
- (4) the Company or another party repurchases all of the Securities issued in reliance on Section 4(a)(6) of the 1933 Act, including any payment in full of debt securities or any complete redemption of redeemable securities; or
- (5) the Company liquidates or dissolves its business in accordance with state law.

Neither the Company nor any of its predecessors (if any) previously failed to comply with the ongoing reporting requirement of Regulation CF.

About this Form C

You should rely only on the information contained in this Form C. We have not authorized anyone to provide you with information different from that contained in this Form C. We are offering to sell, and seeking offers to buy the Securities only in jurisdictions where offers and sales are permitted. You should assume that the information contained in this Form C is accurate only as of the date of this Form C, regardless of the time of delivery of this Form C or of any sale of Securities. Our business, financial condition, results of operations, and prospects may have changed since that date.

Statements contained herein as to the content of any agreements or other document are summaries and, therefore, are necessarily selective and incomplete and are qualified in their entirety by the actual agreements or other documents. The Company will provide the opportunity to ask questions of and receive answers from the Company's management concerning terms and conditions of the Offering, the Company or any other relevant matters and any additional reasonable information to any prospective Purchaser prior to the consummation of the sale of the Securities.

This Form C does not purport to contain all of the information that may be required to evaluate the Offering and any recipient hereof should conduct its own independent analysis. The statements of the Company contained herein are based on information believed to be reliable. No warranty can be made as to the accuracy of such information or that circumstances have not changed since the date of this Form C. The Company does not expect to update or otherwise revise this Form C or other materials supplied herewith. The delivery of this Form C at any time does not imply that

the information contained herein is correct as of any time subsequent to the date of this Form C. This Form C is submitted in connection with the Offering described herein and may not be reproduced or used for any other purpose.

SUMMARY

The Business

The following summary is qualified in its entirety by more detailed information that may appear elsewhere in this Form C and the Exhibits hereto. Each prospective Purchaser is urged to read this Form C and the Exhibits hereto in their entirety.

IntroBlue, LLC is a Delaware Limited Liability Company, formed on 10/13/2017. The Company is currently also conducting business under the name of Intro-Act and Blueshift Research.

The Company is located at 75 Second Ave, Suite 605 Needham, MA 02494.

The Company's website is <https://www.intro-act.com>.

The Company previously operated as a Delaware LLC under the name Accessi2u, LLC. Accessi2u, LLC was formed on 05/18/2016 and reincorporated in Delaware as a Limited Liability Company on 10/13/2017.

A description of our products as well as our services, process, and business plan can be found on the Company's profile page on the SI Securities, LLC ("SeedInvest") website under <https://www.seedinvest.com/intro.blue> and is attached as Exhibit C to the Form C of which this Offering Memorandum forms a part.

The Offering

Minimum amount of Crowd Note being offered	\$25,000
Maximum amount of Crowd Note	\$1,070,000
Purchase price per Security	Determined in conjunction with a broker-dealer. Not Applicable
Minimum investment amount per investor	\$1,000
Offering deadline	March 22, 2019
Use of proceeds	See the description of the use of proceeds on page 14 and 15 hereof.
Voting Rights	See the description of the voting rights on pages 11, 16, 18, and 19.

RISK FACTORS

The SEC requires the Company to identify risks that are specific to its business and its financial condition. The Company is still subject to all the same risks that all companies in its business, and all companies in the economy, are exposed to. These include risks relating to economic downturns, political and economic events and technological developments (such as hacking and the ability to prevent hacking). Additionally, early-stage companies are inherently more risky than more developed companies. You should consider general risks as well as specific risks when deciding whether to invest.

Risks Related to the Company's Business and Industry

The Company's sales cycle is long and may be unpredictable, which can result in variability of its financial performance. Additionally, long sales cycles may require the Company to incur high sales and marketing expenses with no assurance that a sale will result, which could adversely affect its profitability. The Company's results of operations may fluctuate, in part, because of the resource-intensive nature of its sales efforts and the length and variability of the sales cycle. A sales cycle is the period between initial contact with a prospective customer and any sale of its tools and services. The sales process involves educating customers about the Company's tools and services, participating in extended tools and services evaluations and configuring the tools and services to customer-

specific needs. The length of the sales cycle, from initial contact with a customer to the execution of a purchase order, is generally 2 to 5 months. During the sales cycle, the Company may expend significant time and money on sales and marketing activities or make other expenditures, all of which lower its operating margins, particularly if no sale occurs or if the sale is delayed as a result of extended qualification processes or delays. It is difficult to predict when, or even if, it will make a sale to a potential customer or if the Company can increase sales to existing customers. As a result, the Company may not recognize revenue from sales efforts for extended periods of time, or at all. The loss or delay of one or more large transactions in a quarter could impact its results of operations for that quarter and any future quarters for which revenue from that transaction is lost or delayed.

Its proprietary technology has a limited history and may perform below expectations. The Company uses proprietary technology that has not been previously implemented on customer projects, and it may experience technological problems that it is unable to foresee. If the implementation of its proprietary technology is unsuccessful, it could negatively impact the successful operation of projects using its systems and may result in additional payments, deductions or defaults under its agreements. In addition, there is a lack of long-term reliability data for its proprietary system. Actual long-term performance of these projects, may fall short of expectations. Its equipment may be susceptible to damage from weather-related or other unforeseen events. Equipment performance issues could result in significant operational problems for its Company, including increased maintenance costs, decreased revenue, warranty claims, inability to meet delivery requirements or defaults under its agreements.

The company is still beta testing the first version of their application. Sophisticated technology platforms often contain errors or defects, such as errors in computer code or other systems errors, particularly when first introduced or when new versions or enhancements are released. The development of new or enhanced products is a complex and uncertain process requiring the accurate anticipation of technological and market trends, as well as precise technological execution. Despite quality assurance measures, internal testing and beta testing by customers, the Company cannot guarantee that its current and future products, including upgrades to those products, will be free of serious defects, which could result in lost revenue, refunds without a commensurate decrease in costs, delays in market acceptance, increase in costs, reputational harm and costs associated with defending or settling claims. If upgrades are not properly implemented, the availability and functioning of our products could be impaired.

Failure to obtain new clients or renew client contracts on favorable terms could adversely affect results of operations. The Company may face pricing pressure in obtaining and retaining their clients. Their clients may be able to seek price reductions from them when they renew a contract, when a contract is extended, or when the client's business has significant volume changes. Their clients may also reduce services if they decide to move services in-house. On some occasions, this pricing pressure results in lower revenue from a client than the Company had anticipated based on their previous agreement with that client. This reduction in revenue could result in an adverse effect on their business and results of operations.

Further, failure to renew client contracts on favorable terms could have an adverse effect on their business. The Company's contracts with clients generally run for several years and include liquidated damage provisions that provide for early termination fees. Terms are generally renegotiated prior to the end of a contract's term. If they are not successful in achieving a high rate of contract renewals on favorable terms, their business and results of operations could be adversely affected.

Maintaining, extending and expanding our reputation and brand image are essential to our business success. We seek to maintain, extend, and expand our brand image through marketing investments, including advertising and consumer promotions, and product innovation. Increasing attention on marketing could adversely affect our brand image. It could also lead to stricter regulations and greater scrutiny of marketing practices. Existing or increased legal or regulatory restrictions on our advertising, consumer promotions and marketing, or our response to those restrictions, could limit our efforts to maintain, extend and expand our brands. Moreover, adverse publicity about regulatory or legal action against us could damage our reputation and brand image, undermine our customers' confidence and reduce long-term demand for our products, even if the regulatory or legal action is unfounded or not material to our operations.

In addition, our success in maintaining, extending, and expanding our brand image depends on our ability to adapt to a rapidly changing media environment. We increasingly rely on social media and online dissemination of advertising campaigns. The growing use of social and digital media increases the speed and extent that information or misinformation and opinions can be shared. Negative posts or comments about us, our brands or our products on social or digital media, whether or not valid, could seriously damage our brands and reputation. If we do not establish, maintain, extend and expand our brand image, then our product sales, financial condition and results of operations could be adversely affected.

The Company may be unable to maintain, promote, and grow its brand through marketing and communications strategies. It may prove difficult for the Company to dramatically increase the number of customers that it serves or to establish itself as a well-known brand in the competitive FinTech space. Additionally, the product may be in a market where customers will not have brand loyalty.

The CEO and President are paid high salaries. The Company's CEO and President are paid salaries that are high relative to the stage of the Company's business, and personnel costs represent a significant portion of the Company's operating expenses. High executive compensation results in a higher overall salary burn, which in turn shortens the runway for achieving desired traction and company milestones. High executive compensation can leave a negative impression with new or potential investors who may believe that conservatively compensated founder-CEOs are more focused on driving towards the long-term success of the business. It may therefore negatively impact the ability of the Company to raise funds.

The development and commercialization of the Company's products and services are highly competitive. It faces competition with respect to any products and services that it may seek to develop or commercialize in the future. Its competitors include major companies worldwide. The FinTech market is an emerging industry where new competitors are entering the market frequently. Many of the Company's competitors have significantly greater financial, technical and human resources and may have superior expertise in research and development and marketing approved services and thus may be better equipped than the Company to develop and commercialize services. These competitors also compete with the Company in recruiting and retaining qualified personnel and acquiring technologies. Smaller or early stage companies may also prove to be significant competitors, particularly through collaborative arrangements with large and established companies. Accordingly, the Company's competitors may commercialize products more rapidly or effectively than the Company is able to, which would adversely affect its competitive position, the likelihood that its services will achieve initial market acceptance and its ability to generate meaningful additional revenues from its products and services.

The Company relies heavily on their technology and intellectual property, but they may be unable to adequately or cost-effectively protect or enforce their intellectual property rights, thereby weakening their competitive position and increasing operating costs. To protect their rights in our services and technology, they rely on a combination of copyright and trademark laws, patents, trade secrets, confidentiality agreements with employees and third parties, and protective contractual provisions. They also rely on laws pertaining to trademarks and domain names to protect the value of their corporate brands and reputation. Despite their efforts to protect their proprietary rights, unauthorized parties may copy aspects of their services or technology, obtain and use information, marks, or technology that they regard as proprietary, or otherwise violate or infringe their intellectual property rights. In addition, it is possible that others could independently develop substantially equivalent intellectual property. If they do not effectively protect their intellectual property, or if others independently develop substantially equivalent intellectual property, their competitive position could be weakened.

Effectively policing the unauthorized use of their services and technology is time-consuming and costly, and the steps taken by them may not prevent misappropriation of their technology or other proprietary assets. The efforts they have taken to protect our proprietary rights may not be sufficient or effective, and unauthorized parties may copy aspects of their services, use similar marks or domain names, or obtain and use information, marks, or technology that they regard as proprietary. They may have to litigate to enforce their intellectual property rights, to protect their trade secrets, or to determine the validity and scope of others' proprietary rights, which are sometimes not clear or may change. Litigation can be time consuming and expensive, and the outcome can be difficult to predict.

We plan to implement new lines of business or offer new products and services within existing lines of business. There are substantial risks and uncertainties associated with these efforts, particularly in instances where the markets are not fully developed. In developing and marketing new lines of business and/or new products and services, we may invest significant time and resources. Initial timetables for the introduction and development of new lines of business and/or new products or services may not be achieved and price and profitability targets may not prove feasible. We may not be successful in introducing new products and services in response to industry trends or developments in technology, or those new products may not achieve market acceptance. As a result, we could lose business, be forced to price products and services on less advantageous terms to retain or attract clients, or be subject to cost increases. As a result, our business, financial condition or results of operations may be adversely affected.

Through our operations, we collect and store certain personal information that our customers provide to purchase products or services, enroll in promotional programs, register on our website, or otherwise communicate and interact with us. We may share information about such persons with vendors that assist with certain aspects of our business. Security could be compromised and confidential customer or business information misappropriated. Loss of customer or business information could disrupt our operations, damage our reputation, and expose us to claims from customers, financial institutions, payment card associations and other persons, any of

which could have an adverse effect on our business, financial condition and results of operations. In addition, compliance with tougher privacy and information security laws and standards may result in significant expense due to increased investment in technology and the development of new operational processes.

We are subject to many U.S. federal and state laws and regulations, including those related to privacy, rights of publicity, and law enforcement. These laws and regulations are constantly evolving and may be interpreted, applied, created, or amended, in a manner that could harm our business. The technology and use of the technology in our product may not be legislated, and it is uncertain whether different states will legislate around this technology, and, if they do, how they will do so. Violating existing or future regulatory orders or consent decrees could subject us to substantial monetary fines and other penalties that could negatively affect our financial condition and results of operations.

Our business could be negatively impacted by cyber security threats, attacks and other disruptions. Like others in our industry, we continue to face advanced and persistent attacks on our information infrastructure where we manage and store various proprietary information and sensitive/confidential data relating to our operations. These attacks may include sophisticated malware (viruses, worms, and other malicious software programs) and phishing emails that attack our products or otherwise exploit any security vulnerabilities. These intrusions sometimes may be zero-day malware that are difficult to identify because they are not included in the signature set of commercially available antivirus scanning programs. Experienced computer programmers and hackers may be able to penetrate our network security and misappropriate or compromise our confidential information or that of our customers or other third-parties, create system disruptions, or cause shutdowns. Additionally, sophisticated software and applications that we produce or procure from third-parties may contain defects in design or manufacture, including "bugs" and other problems that could unexpectedly interfere with the operation of the information infrastructure. A disruption, infiltration or failure of our information infrastructure systems or any of our data centers as a result of software or hardware malfunctions, computer viruses, cyber attacks, employee theft or misuse, power disruptions, natural disasters or accidents could cause breaches of data security, loss of critical data and performance delays, which in turn could adversely affect our business.

The Company has not filed a Form D for its prior offerings. The SEC rules require a Form D to be filed by companies within 15 days after the first sale of securities in the offering relying on Regulation D. Failing to register with the SEC or get an exemption may lead to fines, the right of investors to get their investments back, and even criminal charges. There is a risk that a late penalty could apply.

The Company had not yet formed a Board when they raised previous rounds. Although the Company is not legally required to have a board to conduct operations, boards play a critical role in effective risk oversight. They have since put a board in place.

The Company has outstanding liabilities. The Company has entered into loans, payable on demand, for \$150,000, including a related party issued a promissory note to Bill Jenks, for \$100,000. The lump sum is payable on demand and bears interest at 2%. During 2016, members of the Company advanced funds to to be used in operations. These advances, totaling \$8,180 have no specific terms and are payable upon demand. The Company has expressed that the funds from this round will not be used to payoff this debt.

Risks Related to the Securities

The Crowd Notes will not be freely tradable until one year from the initial purchase date. Although the Crowd Notes may be tradable under federal securities law, state securities regulations may apply and each Purchaser should consult with his or her attorney. You should be aware of the long-term nature of this investment. There is not now and likely will not be a public market for the Crowd Notes. Because the Crowd Notes have not been registered under the 1933 Act or under the securities laws of any state or non-United States jurisdiction, the Crowd Notes have transfer restrictions under Rule 501 of Regulation CF. It is not currently contemplated that registration under the 1933 Act or other securities laws will be effected. Limitations on the transfer of the Crowd Notes may also adversely affect the price that you might be able to obtain for the Crowd Notes in a private sale. Purchasers should be aware of the long-term nature of their investment in the Company. Each Purchaser in this Offering will be required to represent that it is purchasing the Securities for its own account, for investment purposes and not with a view to resale or distribution thereof.

We are selling convertible notes that will convert into shares or result in payment in limited circumstances. These notes only convert or result in payment in limited circumstances. If the Crowd Notes reach their maturity date, investors (by a decision of the Crowd Note holders holding a majority of the principal amount of the outstanding Crowd Notes) will either (a) receive payment equal to the total of their purchase price plus outstanding accrued interest, or (b) convert the Crowd Notes into shares of the Company's most senior class of preferred stock, and if no preferred stock has been issued, then shares of Company's common stock. If there is a merger, buyout or other corporate transaction that occurs before a qualified equity financing, investors will receive a payment of the greater

of two times their purchase price or the amount of preferred shares they would have been able to purchase using the valuation cap. If there is a qualified equity financing (an initial public offering registered under the 1933 Act or a financing using preferred shares), the notes will convert into a yet to-be-determined class of preferred stock. If the notes convert because they have reached their maturity date, the notes will convert based on a \$7,000,000 valuation cap. If the notes convert due to a qualified equity financing, the notes will convert at a discount of 20, or based on a \$7,000,000 valuation cap. This means that investors would be rewarded for taking on early risk compared to later investors. Outside investors at the time of conversion, if any, might value the Company at an amount well below the \$7,000,000 valuation cap, so you should not view the \$7,000,000 as being an indication of the Company's value.

We have not assessed the tax implications of using the Crowd Note. The Crowd Note is a type of debt security. As such, there has been inconsistent treatment under state and federal tax law as to whether securities like the Crowd Note can be considered a debt of the Company, or the issuance of equity. Investors should consult their tax advisers.

The Crowd Note contains dispute resolution provisions which limit your ability to bring class action lawsuits or seek remedy on a class basis. By purchasing a Crowd Note this Offering, you agree to be bound by the dispute resolution provisions found in Section 6 of the Crowd Note. Those provisions apply to claims regarding this Offering, the Crowd Notes and possibly the securities into which the Crowd Note are convertible. Under those provisions, disputes under the Crowd Note will be resolved in arbitration conducted in Delaware. Further, those provisions may limit your ability to bring class action lawsuits or similarly seek remedy on a class basis.

You may have limited rights. The Company has not yet authorized preferred stock, and there is no way to know what voting rights those securities will have. In addition, as an investor in the Regulation CF offering you will be considered a Non-Major Investor (as defined below) under the terms of the notes offered, and therefore, you have more limited information rights.

You will be bound by an investment management agreement which limits your voting rights. As a result of purchasing the notes, all Non-Major Investors (including all investors investing under Regulation CF) will be bound by an investment management agreement. This agreement will limit your voting rights and at a later time may require you to convert your future preferred shares into common shares without your consent. Non-Major Investors will be bound by this agreement, unless Non-Major Investors holding a majority of the principal amount outstanding of the Crowd Notes (or majority of the shares of the preferred equity the notes will convert into) held by Non-Major Investors vote to terminate the agreement.

A majority of the Company is owned by a small number of owners. Prior to the Offering, the Company's current owners of 20% or more of the Company's outstanding voting securities beneficially own up to 33% of the Company's voting securities. Subject to any fiduciary duties owed to our other owners or investors under Delaware law, these owners may be able to exercise significant influence over matters requiring owner approval, including the election of directors or managers and approval of significant Company transactions, and will have significant control over the Company's management and policies. Some of these persons may have interests that are different from yours. For example, these owners may support proposals and actions with which you may disagree. The concentration of ownership could delay or prevent a change in control of the Company or otherwise discourage a potential acquirer from attempting to obtain control of the Company, which in turn could reduce the price potential investors are willing to pay for the Company. In addition, these owners could use their voting influence to maintain the Company's existing management, delay or prevent changes in control of the Company, or support or reject other management and board proposals that are subject to owner approval.

BUSINESS

Description of the Business

THE PROBLEM

Traditional methods used by public companies to access institutional investors have bloated costs. Investors pay brokers >\$2B annually for facilitating corporate access. Corporate executives spend 10% to 20% of their time meeting with investors, many of whom are incompatible. This process becomes a waste of time and money for both investors and corporations. MiFID II regulations aim to protect the common investor from overpaying, mandating that brokers can no longer charge to facilitate corporate access. But this solution exacerbates the problem as brokers no longer serve as a filter and corporate executives continue meeting with incompatible investors.

Corporations: Access events are expensive and time-consuming, and often lack purpose.

Investors: Overloaded with too many event invitations, meetings are accepted without interest or preparation.

Broker/Independent Research Providers: Meetings are booked to get a commission, and with little concern for compatibility.

THE SOLUTION

Intro-Blue's machine learning prediction engine targets the most likely institutional buyers and sellers of a stock in the next 90 days and offers independent research to promote efficiency and transparency throughout the corporate access and investment process.

Intro-Blue's services facilitate higher-quality meetings by helping prepare both investors and corporate executives. We do this by offering centralized access to critical materials including video, models, commissioned research, and agenda materials.

The result is converting meetings with investors into actual investors, improving ROI on corporate access.

VALUE

- Better Targeting
- Meeting Procurement
- Investor Preparation
- Higher ROI

Higher meeting conversion = more investors, longer investor retention, and optimized investor position size.

Business Plan

PRODUCTS

Intro-Blue offers two product lines:

Intro-act: Machine learning-driven corporate access that connects investors and corporations through intelligent targeting and primary research, and identifies the most likely buyers and sellers of a stock in the next 90 days.

Blueshift Research: Subscription research service for institutional investors and custom research for investors and corporations.

TECHNOLOGY

Our prediction engine is an ensemble of two machine learning methodologies. First, the core model is an aggregation of 5,000 unique machines, each tuned to replicate the trading behaviors of an individual institutional investor. Second, our all-funds model trains on activities simultaneously over the last several quarters and characterizes each investor's sensitivity to ~600 factors on a sector basis.

Intro-act's proprietary model assumes that fund managers make trading decisions in a predictable way based on data that fall into five categories: Macroeconomic, Technical, Valuation, Sentimental, and Fundamental.

Intro-act's technology is related to 1) Data - proprietary data from corporate access events, 2) Domain Expertise - organizing and clustering of data sets, and 3) Analytics - layering different types of algorithms in an ensemble.

REVENUE MODEL

Intro-Blue combines recurring revenue subscription models with transactional upsells.

For Corporations: Intro-act is a price leader with an entry-level solution starting at \$500/month. Higher service tiers are up to \$2,500/month. Upsell services include videos, models, research, and peer benchmarking; we expect average Intro-act corporate customers to spend \$20,000/year. Blueshift Research's Custom Reports for corporations range from \$10,000 to \$50,000.

For Research Providers: Subscription model starts at \$250/month for access to predicted leads and analytics. Upsell includes support through sales channel partners (brokers) and a custom research procurement process with a ~25% commission take.

For Institutional Investors: Blueshift Research subscription is \$5,000/month. Blueshift Research's Custom Reports for investors range from \$10,000 to \$50,000. Monetization of investors on Intro-act is in development. This will include research, access event preparation tools, peer analytics, and alpha signal generation.

For Brokerage Firms: Subscription model starts at \$4,000/month for predicted leads and analytics.

INTRO-BLUE TARGET CUSTOMERS

1. Corporate investor relations
2. Brokerage corporate access, trading desks
3. IR service firms
4. Institutional investors
5. Registered investment advisors
6. Independent research providers

COMPETITIVE ADVANTAGE

Intro-act has predictive accuracy at over 60% and a low standard deviation. Over 600 factors of influence in a 5-layer hierarchy are used to explain why an investor is compatible to make an investment, rather than relying solely on investor characteristics (AUM, style, etc.). Intro-act is embedded in the investor access process, rather than a standalone analytics tool. This will gain clients “soft-data” insights from each successive investor access event. Intro-act machine learning has a 3-year track record tracking 4,000 investors and 3,400 companies.

Blueshift Research and Intro-act are used at the time of the trade when information is at a premium. Blueshift Research clients are top-tier investors who also can purchase Intro-act services.

The combination of Intro-act and Blueshift provides the advantage of bringing content and domain expertise to our targeting and prediction engine with a vast potential audience of corporations, investors, brokers, research providers, and investor relations service firms.

The Company’s Products and/or Services

Product / Service	Description	Current Market
<p>IntroBlue offers two products:</p> <p>Intro-act</p> <p>Blueshift Research</p>	<p>IntroBlue offers two products:</p> <p><u>Intro-act</u> optimizes how public companies access their investors through machine learning enabled targeting, automated meeting procurement and meeting preparation services.</p> <p><u>Blueshift Research</u> delivers primary research services to institutional investors and corporations.</p>	<p>The corporate/investor access market totals >\$10Bn.</p> <p>Corporates spend >\$5Bn on Investor Relations – this market has grown ~5% Y/Y historically, but likely accelerates due to MiFID II.</p> <p>Investors pay brokers >\$5Bn for corporate access. Allocation to corporate access is stable with the average corporate access meeting costing ~\$2K.</p> <p>Investors pay ~\$15Bn for research services. Budgets are continuing to shift away from traditional brokers toward independent providers like Blueshift Research.</p>

Competition

The markets in which our products are sold are highly competitive. Our products compete against similar products of many large and small companies, including well-known global competitors. In many of the markets and industry segments in which we sell our products, we compete against other branded products as well as retailers’ private-label brands. Product quality, performance, value and packaging are also important differentiating factors.

Customer Base

IntroBlue’s customer base includes institutional investors and corporations consuming research services. In addition, Intro-act current customer base includes large corporations such as Legg Mason and Voya, as well as smaller companies including Anixa Biosciences and Genprex.

Intellectual Property

The Company is dependent on the following intellectual property: None

Litigation

None.

USE OF PROCEEDS

We will adjust roles and tasks based on the net proceeds of the Offering. We plan to use these proceeds as described below.

Offering Expenses

The use of proceeds for expenses related to the Combined Offering is as follows:

- If the Company raises the Target Amount, it will use 47.50% of the proceeds, or \$11,875, towards offering expenses;
- If the Company raises the Closing Amount, it will use 8.43% of the proceeds, or \$90,250, towards offering expenses; and
- If the Company raises the Maximum Amount, it will use 8.43% of the proceeds, or \$90,250, towards offering expenses

The proceeds remaining after meeting offering expenses will be used as follows:

Use of Proceeds	% if Target Amount Raised	% if Closing Amount Raised	% if Maximum Amount Raised
General Expenses	42%	42%	27%
Data Scientist	14%	14%	9%
Product Manager	0%	0%	6%
Market Strategist	0%	0%	6%
Sales Staff	6%	6%	11%
Alternative Data	12%	12%	13%
Marketing- Conf., etc	5%	5%	6%
Partnership Development	4%	4%	5%
Mobile App	3%	3%	3%
Office / Overhead	3%	3%	3%
Cost of Capital	11%	11%	11%

The above table of the anticipated use of proceeds is not binding on the Company and is merely a description of its current intentions.

We reserve the right to change the above use of proceeds if management believes it is in the best interests of the Company.

DIRECTORS, OFFICERS, AND MANAGERS

The directors, officers, and managers of the Company are listed below along with all positions and offices held at the Company and their principal occupation and employment responsibilities for the past three (3) years.

Name	Positions and Offices Held at the Company	Principal Occupation and Employment Responsibilities for the Last Three (3) Years
Bill Jenks	CEO and Co-Founder (October 2017 - Present), corporate strategy, sales and marketing.	CEO, Blueshift Research (January 2010 - October 2017), corporate strategy, sales and marketing.
Peter Wright	President and Co-Founder (October 2017 - Present), product vision and development and customer engagement.	Co-Founder, Intro-Act (March 2016 - October 2017), Product development; Analyst, AI Capital (Oct. 2015 - Aug 2018), manage a long-short portfolio.

Indemnification

Indemnification is authorized by the Company to managers, officers or controlling persons acting in their professional capacity pursuant to Delaware law. Indemnification includes expenses such as attorney's fees and, in certain circumstances, judgments, fines and settlement amounts actually paid or incurred in connection with actual or threatened actions, suits or proceedings involving such person, except in certain circumstances where a person is adjudged to be guilty of gross negligence or willful misconduct, unless a court of competent jurisdiction determines that such indemnification is fair and reasonable under the circumstances.

Employees

The Company currently has 6 employees in Massachusetts.

CAPITALIZATION AND OWNERSHIP

Capitalization

The Company has issued the following outstanding Securities:

Type of security	Amount outstanding	Voting rights	How this security may limit, dilute, or qualify the Securities issues pursuant to this Offering	Percentage ownership of the Company by the holders of such securities prior to the Offering	Other material terms
Common Stock	11,357,143	Yes	N/A	100%	
Option Pool	1,500,000	N/A	If exercised	0%	

The Company has the following debt outstanding:

Type of debt	Name of creditor	Amount outstanding	Interest rate and payment schedule	Amortization schedule	Describe any collateral or security	Maturity date	Other material terms
Loan	Individual Creditors including Bill Jenks	\$150,000	6%	N/A	N/A	N/A	Payable on Demand

Ownership

A majority of the Company is owned by a few individuals. Those individuals are Stage 1 Ventures and Blueshift Research Holdings.

Below are the beneficial owners of 20% percent or more of the Company's outstanding voting equity securities, calculated on the basis of voting power, are listed along with the amount they own.

Name	Number and type/class of security held	Percentage ownership
Stage 1 Ventures	Common Stock	33.8%
Blueshift Research Holdings	Common Stock	26.9%

FINANCIAL INFORMATION

Please see the financial information listed on the cover page of this Form C and attached hereto in addition to the following information. Financial statements are attached hereto as Exhibit B.

Operations

Intro-Blue LLC ("the Company") is a limited liability company organized under the laws of the State of Delaware, and headquartered in Needham, Massachusetts. The Company matches corporate executives with institutional investors most likely to buy or sell their stock in the next 90 days. Intro-Blue combines an artificial intelligence (AI) platform with an independent primary research platform to prepare investors and corporates for productive meetings.

Intro- Blue offers two product lines Intro-Act and Blueshift Research. Intro-Act is a machine learning-drive corporate access connecting investors and corporations through intelligent targeting and primary research and identifying the most likely buyers and sellers of a stock in the next 60 days. Blueshift Research is a subscription research service for institutional investor and custom research for investors and corporations.

Liquidity and Capital Resources

The proceeds from the Offering are essential to our operations. We plan to use the proceeds as set forth above under "Use of Proceeds", which is an indispensable element of our business strategy. The Offering proceeds will have a beneficial effect on our liquidity, as we have approximately \$16,000 in cash on hand as of 1/24/2019 which will be augmented by the Offering proceeds and used to execute our business strategy.

The Company currently does not have any additional outside sources of capital other than the proceeds from the Combined Offerings.

Capital Expenditures and Other Obligations

The Company does not intend to make any material capital expenditures in the future.

Trends and Uncertainties

After reviewing the above discussion of the steps the Company intends to take, potential Purchasers should consider whether achievement of each step within the estimated time frame is realistic in their judgment. Potential Purchasers should also assess the consequences to the Company of any delays in taking these steps and whether the Company will need additional financing to accomplish them.

The financial statements are an important part of this Form C and should be reviewed in their entirety. The financial statements of the Company are attached hereto as Exhibit B.

Valuation

Before making an investment decision, you should carefully consider this valuation and the factors used to reach such valuation. Such valuation may not be accurate and you are encouraged to determine your own independent value of the Company prior to investing.

As discussed in "Dilution" below, the valuation will determine the amount by which the investor's stake is diluted immediately upon investment. An early-stage company typically sells its shares (or grants options over its shares) to its founders and early employees at a very low cash cost, because they are, in effect, putting their "sweat equity" into the Company. When the Company seeks cash investments from outside investors, like you, the new investors typically pay a much larger sum for their shares than the founders or earlier investors, which means that the cash value of your stake is immediately diluted because each share of the same type is worth the same amount, and you paid more for your shares (or the notes convertible into shares) than earlier investors did for theirs.

There are several ways to value a company. None of them is perfect and all of them involve a certain amount of guesswork. The same method can produce a different valuation if used by a different person.

Liquidation Value - The amount for which the assets of the Company can be sold, minus the liabilities owed, e.g., the assets of a bakery include the cake mixers, ingredients, baking tins, etc. The liabilities of a bakery include the cost of rent or mortgage on the bakery. However, this value does not reflect the potential value of a business, e.g. the value of the secret recipe. The value for most startups lies in their potential, as many early stage companies do not have many assets (they probably need to raise funds through a securities offering in order to purchase some equipment).

Book Value - This is based on analysis of the Company's financial statements, usually looking at the Company's balance sheet as prepared by its accountants. However, the balance sheet only looks at costs (i.e. what was paid for the asset), and does not consider whether the asset has increased in value over time. In addition, some intangible assets, such as patents, trademarks or trade names, are very valuable but are not usually represented at their market value on the balance sheet.

Earnings Approach - This is based on what the investor will pay (the present value) for what the investor expects to obtain in the future (the future return), taking into account inflation, the lost opportunity to participate in other investments, the risk of not receiving the return. However, predictions of the future are uncertain and valuation of future returns is a best guess.

Different methods of valuation produce a different answer as to what your investment is worth. Typically liquidation value and book value will produce a lower valuation than the earnings approach. However, the earnings approach is

also most likely to be risky as it is based on many assumptions about the future, while the liquidation value and book value are much more conservative.

Future investors (including people seeking to acquire the Company) may value the Company differently. They may use a different valuation method, or different assumptions about the Company's business and its market. Different valuations may mean that the value assigned to your investment changes. It frequently happens that when a large institutional investor such as a venture capitalist makes an investment in a company, it values the Company at a lower price than the initial investors did. If this happens, the value of the investment will go down.

Previous Offerings of Securities

We have made the following issuances of securities within the last three years: None.

THE OFFERING AND THE SECURITIES

The Securities Offered in this Offering

The following description is a brief summary of the material terms of the Securities being offered and is qualified in its entirety by the terms contained in the Crowd Notes.

The Crowd Notes sold in this Offering will convert in the following circumstances:

- If a "corporate transaction" (such as the sale of the Company) occurs prior to a "qualified equity financing" (which is a preferred stock financing raising of not less than \$1,000,000).
- Once a "qualified equity financing" occurs, the notes thereafter will automatically convert into the shares of preferred stock sold in the qualified equity financing.
- If the maturity date is reached, the note holders will have the option, by decision of the majority outstanding note holders, to convert into the Company's most senior class of preferred stock, and if no preferred stock has been issued, then shares of the Company's common stock.

The price at which the Crowd Notes sold in this Offering will convert will be:

- At a discount of 20 to the price in the qualified equity financing, subject to a \$7,000,000 valuation cap, if the conversion takes place after the qualified equity financing;
- If conversion takes place prior to a qualified equity financing due to a corporate transaction, the greater of twice the outstanding principal of the Crowd Notes, or the amount of stock the Crowd Notes would convert into under the valuation cap; or
- If conversion takes place prior to a qualified equity financing because the maturity date has been reached, subject to a \$7,000,000 valuation cap.

Until the earlier of the qualified equity financing or the corporate transaction, the Crowd Notes accrue an annual interest rate of 5.00%, compounded quarterly.

The securities into which the Crowd Notes in this Offering will convert will have more limited voting and information rights than those to be issued to Major Investors on conversion.

Our Target Amount for this Offering to investors under Regulation Crowdfunding is \$25,000.

Additionally, we have set a minimum Closing Amount of \$1,300,000 between our Combined Offerings under Regulation Crowdfunding and Regulation D, which we will need to meet before the Offering may close.

The minimum investment in this Offering is \$10,000. SeedInvest Auto Invest participants have a lower investment minimum in this offering of \$200. Investments of \$20,000 or greater will only be accepted through the Regulation D offering.

All Non-Major Investors of Crowd Notes will be bound by an investment management agreement. This agreement will limit your voting rights and at a later time may require you to convert your future preferred shares into common shares without your consent. Non-Major Investors will be bound by this agreement, unless Non-Major Investors holding a majority of the principal amount outstanding of the Crowd Notes (or majority of the shares of the preferred equity the notes will convert into) held by Non-Major Investors vote to terminate the agreement.

Securities Sold Pursuant to Regulation D

The Company is selling securities in a concurrent offering to accredited investors under Rule 506(c) under the 1933 Act at the same time as this Offering under Regulation Crowdfunding (together, the "Combined Offerings").

The Crowd Notes in the Regulation D offering convert under similar terms to the Crowd Notes in this offering. However, investors who invest \$50,000 or greater will be considered "Major Investors" under the Crowd Note. Major Investors will be entitled to greater information rights than Non-Major Investors in the Combined Offerings. In the future, Major Investors may also be entitled to greater voting rights than their non-major counterparts.

Dilution

Even once the Crowd Note convert into preferred or common equity securities, as applicable, the investor's stake in the Company could be diluted due to the Company issuing additional shares. In other words, when the Company issues more shares (or additional equity interests), the percentage of the Company that you own will go down, even though the value of the Company may go up. You will own a smaller piece of a larger company. This increase in number of shares outstanding could result from a stock offering (such as an initial public offering, another crowdfunding round, a venture capital round or angel investment), employees exercising stock options, or by conversion of certain instruments (e.g. convertible bonds, preferred shares or warrants) into stock.

If a company decides to issue more shares, an investor could experience value dilution, with each share being worth less than before, and control dilution, with the total percentage an investor owns being less than before. There may also be earnings dilution, with a reduction in the amount earned per share (though this typically occurs only if the company offers dividends, and most early stage companies are unlikely to offer dividends, preferring to invest any earnings into the company).

The type of dilution that hurts early-stage investors mostly occurs when a company sells more shares in a "down round," meaning at a lower valuation than in earlier offerings. An example of how this might occur is as follows (numbers are for illustrative purposes only):

- In June 2014 Jane invests \$20,000 for shares that represent 2% of a company valued at \$1 million.
- In December, the company is doing very well and sells \$5 million in shares to venture capitalists on a valuation (before the new investment) of \$10 million. Jane now owns only 1.3% of the company but her stake is worth \$200,000.
- In June 2015 the company has run into serious problems and in order to stay afloat it raises \$1 million at a valuation of only \$2 million (the "down round"). Jane now owns only 0.89% of the company and her stake is worth only \$26,660.

This type of dilution might also happen upon conversion of convertible notes into shares. Typically, the terms of convertible notes issued by early-stage companies provide that in the event of another round of financing, the holders of the convertible notes get to convert their notes into equity at a "discount" to the price paid by the new investors, i.e., they get more shares than the new investors would for the same price. Additionally, convertible notes may have a "price cap" on the conversion price, which effectively acts as a share price ceiling. Either way, the holders of the convertible notes get more shares for their money than new investors. In the event that the financing is a "down round" the holders of the convertible notes will dilute existing equity holders, and even more than the new investors do, because they get more shares for their money.

If you are making an investment expecting to own a certain percentage of the Company or expecting each share to hold a certain amount of value, it's important to realize how the value of those shares can decrease by actions taken by the Company. Dilution can make drastic changes to the value of each share, ownership percentage, voting control, and earnings per share.

Tax Matters

EACH PROSPECTIVE PURCHASER SHOULD CONSULT WITH HIS OWN TAX AND ERISA ADVISOR AS TO THE PARTICULAR CONSEQUENCES TO THE PURCHASER OF THE PURCHASE, OWNERSHIP AND SALE OF THE PURCHASER'S SECURITIES, AS WELL AS POSSIBLE CHANGES IN THE TAX LAWS.

Restrictions on Transfer

Any Securities sold pursuant to Regulation CF being offered may not be transferred by any Purchaser of such Securities during the one-year holding period beginning when the Securities were issued, unless such Securities are transferred: 1) to the Company, 2) to an accredited investor, as defined by Rule 501(a) of Regulation D promulgated under the 1933 Act, 3) as part of an IPO or 4) to a member of the family of the Purchaser or the equivalent, to a trust controlled by the Purchaser, to a trust created for the benefit of a member of the family of the Purchaser or the equivalent, or in connection with the death or divorce of the Purchaser or other similar circumstances. "Member of the family" as used herein means a child, stepchild, grandchild, parent, stepparent, grandparent, spouse or spousal equivalent, sibling, mother/father/daughter/son/sister/brother-in-law, and includes adoptive relationships. Remember that although you may legally be able to transfer the Securities, you may not be able to find another party willing to purchase them.

In addition to the foregoing restrictions, prior to making any transfer of the Securities or any Securities into which they are convertible, such transferring Purchaser must either make such transfer pursuant to an effective registration statement filed with the SEC or provide the Company with an opinion of counsel stating that a registration statement is not necessary to effect such transfer.

Other Material Terms

The Company does not have the right to repurchase the Securities. The Securities do not have a stated return or liquidation preference.

Related Person Transactions

From time to time the Company may engage in transactions with related persons. Related persons are defined as any manager, director, or officer of the Company; any person who is the beneficial owner of 10 percent or more of the Company's outstanding voting equity securities, calculated on the basis of voting power; any promoter of the Company; any immediate family member of any of the foregoing persons or an entity controlled by any such person or persons.

The Company has conducted the following transactions with related persons:

During 2016, members advanced funds to the Company to be used in operations. These advances had no specific terms and are payable upon demand. At both December 31, 2017 and 2016, unpaid advances totaled \$8,180.

During 2017, the Company issued a promissory note to Bill Jenks, for \$100,000. The lump sum is payable on demand and bears interest at 2%.

Conflicts of Interest

The Company has engaged in the following transactions or relationships, which may give rise to a conflict of interest with the Company, its operations and its security holders: Not Applicable.

SEEDINVEST INVESTMENT PROCESS

Making an Investment in the Company

How does investing work?

When you complete your investment on SeedInvest, your money will be transferred to an escrow account where an independent escrow agent will watch over your investment until it is accepted by the Company. Once the Company accepts your investment, and certain regulatory procedures are completed, your money will be transferred from the escrow account to the Company in exchange for your Crowd Note. At that point, you will be an investor in the Company.

SeedInvest Regulation CF rules regarding the investment process:

- Investors may cancel an investment commitment until 48 hours prior to the deadline identified in the issuer's Offering materials;
- The intermediary will notify investors when the target offering amount has been met;
- The Company is making concurrent offerings under both Regulation CF and Regulation D and unless the Company raises at least the target amount under the Regulation CF Offering and the closing amount under both offerings, it will not close this Offering;
- If an issuer reaches a target offering amount and the closing amount prior to the deadline identified in its offering materials, it may close the Offering early if it provides notice about the new Offering deadline at least five business days prior to such new Offering deadline;
- If there is a material change and an investor does not reconfirm his or her investment commitment, the investor's investment commitment will be cancelled and the committed funds will be returned;
- If an issuer does not reach both the target offering amount and the closing offering amount prior to the deadline identified in its offering materials, no Securities will be sold in the Offering, investment commitments will be cancelled and committed funds will be returned; and
- If an investor does not cancel an investment commitment before the 48-hour period prior to the Offering deadline, the funds will be released to the issuer upon closing of the Offering and the investor will receive Securities in exchange for his or her investment.

What will I need to complete my investment?

To make an investment you will need the following information readily available:

1. Personal information such as your current address and phone number
2. Employment and employer information
3. Net worth and income information
4. Social Security Number or government-issued identification
5. ABA bank routing number and checking account number

What is the difference between preferred equity and a convertible note?

Preferred equity is usually issued to outside investors and carries rights and conditions that are different from that of common stock. For example, preferred equity may include rights that prevent or minimize the effects of dilution or grants special privileges in situations when the Company is sold.

A convertible note is a unique form of debt that converts into equity, usually in conjunction with a future financing round. The investor effectively loans money to the Company with the expectation that they will receive equity in the Company in the future at a discounted price per share when the Company raises its next round of financing. To learn more about startup investment types, check out "How to Choose a Startup Investment" in the SeedInvest Academy.

How much can I invest?

An investor is limited in the amount that he or she may invest in a Regulation Crowdfunding Offering during any 12-month period:

- If either the annual income or the net worth of the investor is less than \$107,000, the investor is limited to the greater of \$2,000 or 5% of the lesser of his or her annual income or net worth.
- If the annual income and net worth of the investor are both equal to or greater than \$107,000, the investor is limited to 10% of the lesser of his or her annual income or net worth, to a maximum of \$107,000. Separately, the Company has set a minimum investment amount.

How can I (or the Company) cancel my investment?

For Offerings made under Regulation Crowdfunding, you may cancel your investment at any time up to 48 hours before a closing occurs or an earlier date set by the Company. You will be sent a reminder notification approximately five days before the closing or set date giving you an opportunity to cancel your investment if you had not already done so. Once a closing occurs, and if you have not cancelled your investment, you will receive an email notifying you that your Securities have been issued. If you have already funded your investment, let SeedInvest know by emailing cancellations@seedinvest.com. Please include your name, the Company's name, the amount, the investment number, and the date you made your investment.

After My Investment

What is my ongoing relationship with the Company?

You are an investor in the Company, you do own securities after all! But more importantly, companies that have raised money via Regulation Crowdfunding must file information with the SEC and post it on their website on an annual basis. Receiving regular company updates is important to keep investors educated and informed about the progress of the Company and their investments. This annual report includes information similar to the Company's initial Form C filing and key information that a company will want to share with its investors to foster a dynamic and healthy relationship.

In certain circumstances a company may terminate its ongoing reporting requirements if:

- (1) the Company is required to file reports under Section 13(a) or Section 15(d) of the Exchange Act;
- (2) the Company has filed at least three annual reports pursuant to Regulation CF and has total assets that do not exceed \$10,000,000;
- (3) the Company has filed at least one annual report pursuant to Regulation CF and has fewer than 300 holders of record;
- (4) the Company or another party repurchases all of the Securities issued in reliance on Section 4(a)(6) of the 1933 Act, including any payment in full of debt securities or any complete redemption of redeemable securities; or
- (5) the Company liquidates or dissolves its business in accordance with state law.

However, regardless of whether a company has terminated its ongoing reporting requirements per SEC rules, SeedInvest works with all companies on its platform to ensure that investors are provided quarterly updates. These quarterly reports will include information such as: (i) quarterly net sales, (ii) quarterly change in cash and cash on hand, (iii) material updates on the business, (iv) fundraising updates (any plans for next round, current round status, etc.), and (v) any notable press and news.

How do I keep track of this investment?

You can return to SeedInvest at any time to view your portfolio of investment and obtain a summary statement. In addition to monthly account statements, you may also receive periodic updates from the Company about its business.

Can I get rid of my Securities after buying them?

Securities purchased through a Regulation Crowdfunding Offering are not freely transferable for one year after the date of purchase, except in the case where they are transferred:

1. To the Company that sold the Securities
2. To an accredited investor
3. As part of an Offering registered with the SEC (think IPO)
4. To a member of the family of the purchaser or the equivalent, to a trust controlled by the purchaser, to a trust created for the benefit of a member of the family of the purchaser, or in connection with the death or divorce of the purchaser

Regardless, after the one year holding period has expired, you should not plan on being able to readily transfer and/or sell your security. Currently, there is no market or liquidity for these Securities and the Company does not have any plans to list these Securities on an exchange or other secondary market. At some point the Company may choose to do so, but until then you should plan to hold your investment for a significant period of time before a "liquidation event" occurs.

SIGNATURE

Pursuant to the requirements of Sections 4(a)(6) and 4A of the Securities Act of 1933 and Regulation Crowdfunding (§ 227.100 et seq.), the issuer certifies that it has reasonable grounds to believe that it meets all of the requirements for filing on Form C and has duly caused this Form to be signed on its behalf by the duly authorized undersigned.
