California Labs, Inc.

Up to \$1,070,000 of Convertible Notes

California Labs, Inc. dba Loop (“California Labs”, the “Company,” “we,” “us”, or “our”), is offering up to \$1,070,000 worth of Convertible Notes of the Company (the “Securities”). Purchasers of Securities are sometimes referred to herein as “Purchasers”. The minimum target offering is \$25,000 (the “Target Amount”). This Offering is being conducted on a best efforts basis and the Company must reach its Target Amount of \$25,000 by October 4, 2019. The Company is making concurrent offerings under both Regulation CF (the “Offering”) and Regulation D (the “Combined Offerings”). Unless the Company raises at least the Target Amount of \$25,000 under the Regulation CF Offering and a total of \$2,600,000 under the Combined Offerings (the “Closing Amount”) by October 4, 2019, no Securities will be sold in this Offering, investment commitments will be cancelled, and committed funds will be returned. The Company will accept oversubscriptions in excess of the Target Amount for the Offering up to \$1,070,000 (the “Maximum Amount”) on a first come, first served basis. If the Company reaches its Closing Amount prior to October 4, 2019, the Company may conduct the first of multiple closings, provided that the Offering has been posted for 21 days and that investors who have committed funds will be provided notice five business days prior to the close. The minimum amount of Securities that can be purchased is \$1,000 per Purchaser (which may be waived by the Company, in its sole and absolute discretion). The offer made hereby is subject to modification, prior sale and withdrawal at any time.

A crowdfunding investment involves risk. You should not invest any funds in this Offering unless you can afford to lose your entire investment.

In making an investment decision, investors must rely on their own examination of the issuer and the terms of the Offering, including the merits and risks involved. These Securities have not been recommended or approved by any federal or state securities commission or regulatory authority. Furthermore, these authorities have not passed upon the accuracy or adequacy of this document.

The U.S. Securities and Exchange Commission (the “SEC”) does not pass upon the merits of any Securities offered or the terms of the Offering, nor does it pass upon the accuracy or completeness of any Offering document or literature.

These Securities are offered under an exemption from registration; however, the SEC has not made an independent determination that these Securities are exempt from registration.

This disclosure document contains forward-looking statements and information relating to, among other things, the Company, its business plan and strategy, and its industry. These forward-looking statements are based on the beliefs of, assumptions made by, and information currently available to the Company's management. When used in this disclosure document and the Company Offering materials, the words "estimate", "project", "believe", "anticipate", "intend", "expect", and similar expressions are intended to identify forward-looking statements. These statements reflect management's current views with respect to future events and are subject to risks and uncertainties that could cause the Company's action results to differ materially from those contained in the forward-looking statements. Investors are cautioned not to place undue reliance on these forward-looking statements to reflect events or circumstances after such state or to reflect the occurrence of unanticipated events.

The Company has certified that all of the following statements are TRUE for the Company in connection with this Offering:

- (1) Is organized under, and subject to, the laws of a State or territory of the United States or the District of Columbia;
- (2) Is not subject to the requirement to file reports pursuant to section 13 or section 15(d) of the Securities Exchange Act of 1934 (the "Exchange Act") (15 U.S.C. 78m or 78o(d));
- (3) Is not an investment company, as defined in section 3 of the Investment Company Act of 1940 (15 U.S.C. 80a-3), or excluded from the definition of investment company by section 3(b) or section 3(c) of that Act (15 U.S.C. 80a-3(b) or 80a-3(c));
- (4) Is not ineligible to offer or sell securities in reliance on section 4(a)(6) of the Securities Act of 1933 (the "1933 Act") (15 U.S.C. 77d(a)(6)) as a result of a disqualification as specified in § 227.503(a);
- (5) Has filed with the SEC and provided to investors, to the extent required, any ongoing annual reports required by law during the two years immediately preceding the filing of this Form C/A; and
- (6) Has a specific business plan, which is not to engage in a merger or acquisition with an unidentified company or companies.

Ongoing Reporting

The Company will file a report electronically with the SEC annually and post the report on its website, no later than April 29, 2020.

Once posted, the annual report may be found on the Company's website at <https://www.joinloop.com/investors>.

The Company must continue to comply with the ongoing reporting requirements until:

- (1) the Company is required to file reports under Section 13(a) or Section 15(d) of the Exchange Act;
- (2) the Company has filed at least three annual reports pursuant to Regulation CF and has total assets that do not exceed \$10,000,000;
- (3) the Company has filed at least one annual report pursuant to Regulation CF and has fewer than 300 holders of record;
- (4) the Company or another party repurchases all of the Securities issued in reliance on Section 4(a)(6) of the 1933 Act, including any payment in full of debt securities or any complete redemption of redeemable securities; or
- (5) the Company liquidates or dissolves its business in accordance with state law.

Neither the Company nor any of its predecessors (if any) previously failed to comply with the ongoing reporting requirement of Regulation CF.

About this Form C/A

You should rely only on the information contained in this Form C/A. We have not authorized anyone to provide you with information different from that contained in this Form C/A. We are offering to sell, and seeking offers to buy the Securities only in jurisdictions where offers and sales are permitted. You should assume that the information contained in this Form C/A is accurate only as of the date of this Form C/A, regardless of the time of delivery of this Form C/A or of any sale of Securities. Our business, financial condition, results of operations, and prospects may have changed since that date.

Statements contained herein as to the content of any agreements or other document are summaries and, therefore, are necessarily selective and incomplete and are qualified in their entirety by the actual agreements or other documents. The Company will provide the opportunity to ask questions of and receive answers from the Company's management concerning terms and conditions of the Offering, the Company or any other relevant matters and any additional reasonable information to any prospective Purchaser prior to the consummation of the sale of the Securities.

This Form C/A does not purport to contain all of the information that may be required to evaluate the Offering and any recipient hereof should conduct its own independent analysis. The statements of the Company contained herein are based on information believed to be reliable. No warranty can be made as to the accuracy of such information or that circumstances have not changed since the date of this Form C/A. The Company does not expect to update or otherwise revise this Form C/A or other materials supplied herewith. The delivery of this Form C/A at any time does not imply that the information contained herein is correct as of any time subsequent to the date of this Form C/A. This Form C/A is submitted in connection with the Offering described herein and may not be reproduced or used for any other purpose.

SUMMARY

The Business

The following summary is qualified in its entirety by more detailed information that may appear elsewhere in this Form C/A and the Exhibits hereto. Each prospective Purchaser is urged to read this Form C/A and the Exhibits hereto in their entirety.

California Labs, Inc. is a Delaware C-Corporation, formed on March 7, 2014. The Company is currently also conducting business under the name of Loop.

The Company is located at 1540 Market St. Suite 100, San Francisco, CA 94102.

The Company's website is <https://www.joinloop.com>.

The Company previously operated as a Delaware C-Corporation under the name Wink Labs, Inc..

A description of our products as well as our services, process, and business plan can be found on the Company's profile page on the SI Securities, LLC ("SeedInvest") website under <http://www.seedinvest.com/loop> and is attached as Exhibit C to the Form C/A of which this Offering Memorandum forms a part.

The Offering

Minimum amount of Convertible Note being offered	\$25,000
Maximum amount of Convertible Note	\$1,070,000
Minimum investment amount per investor	\$1,000
Offering deadline	October 4, 2019
Use of proceeds	See the description of the use of proceeds on pages 14-15 hereof.
Voting Rights	See the description of the voting rights on pages 12, 13, 15, 16, 18-20.

RISK FACTORS

The SEC requires the Company to identify risks that are specific to its business and its financial condition. The Company is still subject to all the same risks that all companies in its business, and all companies in the economy, are exposed to. These include risks relating to economic downturns, political and economic events and technological developments (such as hacking and the ability to prevent hacking). Additionally, early-stage

companies are inherently more risky than more developed companies. You should consider general risks as well as specific risks when deciding whether to invest.

Risks Related to the Company's Business and Industry

The Total Amount Raised, as reflected on the SeedInvest platform, may be partially comprised of investments from the Company's management or affiliates. Such investments are not being counted towards the escrow minimum. If the sum of the investment commitments does not equal or exceed the escrow minimum at the offering end date, no securities will be sold in the offering, investment commitments will be cancelled, and committed funds will be returned. As a result, the Total Amount Raised may not be reflective of the Company's ability to conduct a closing.

The total amount raised may include investments made outside of the SeedInvest platform via Regulation D. \$2.6 million has been raised prior to the launch of the SeedInvest campaign. The earliest investment counted towards the escrow target was made in February 2017. There is no guarantee that the Company has this cash available for operations as of the date of launch. See balance sheet for current cash balance.

Management has included a "going concern" note in the reviewed financials. The Company has incurred losses from inception of approximately \$5,742,456 which, among other factors, raises substantial doubt about the Company's ability to continue as a going concern. The ability of the Company to continue as a going concern is dependent upon management's plans to raise additional capital from the issuance of debt or the sale of stock, its ability to commence profitable sales of its flagship services, and its ability to generate positive operational cash flow. The accompanying financial statements do not include any adjustments that might be required should the Company be unable to continue as a going concern.

We have not prepared any audited financial statements. Therefore, you have no audited financial information regarding the Company's capitalization or assets or liabilities on which to make your investment decision. If you feel the information provided is insufficient, you should not invest in the Company.

Many of company's contracts and future revenue are understood to be contingent / to trigger on the successful development and proof of concept of Loop. Loop is still in development, and the Company's business depends almost entirely on its successful development and commercialization. The Company will require substantial additional development, testing, and potentially regulatory approval before it is able to commercialize its product effectively. This process may take many years and may require the expenditure of substantial resources beyond the proceeds raised in this offering. Accordingly, even if the Company is able to obtain the requisite financing to continue to fund the development of its products, it cannot guarantee that Loop or any other product candidates will be successfully developed or commercialized.

Failure to obtain new clients or renew client contracts on favorable terms could adversely affect results of operations. The Company may face pricing pressure in obtaining and retaining their clients. Their clients may be able to seek price reductions from them when they renew a contract, when a contract is extended, or when the client's business has significant volume changes. On some occasions, this pricing pressure may result in lower revenue from a client than the Company had anticipated based on their previous agreement with that client. This reduction in revenue could result in an adverse effect on their business and results of operations. Further, failure to renew client contracts on favorable terms could have an adverse effect on their business.

The Company has generated substantial net losses and negative operating cash flows since its inception as part of the development of its business. The Company has generated substantial net losses and negative cash flows from operating activities since it commenced operations. Before achieving profitability it will generate continued losses. Its costs may also increase due to such factors as higher than anticipated financing and other costs; non-performance by third-party suppliers, licensees, partners or subcontractors; and increases in the costs of labor or materials. If any of these or similar factors occur, its net losses and accumulated deficit could increase significantly and the value of its stock could decline.

The Company relies heavily on their technology and intellectual property, but they may be unable to adequately or cost-effectively protect or enforce their intellectual property rights, thereby weakening their competitive position and increasing operating costs. To protect their rights in our services and technology, they rely on a combination of copyright and trademark laws, patents, trade secrets, confidentiality agreements with employees and third parties, and protective contractual provisions. They also rely on laws pertaining to trademarks and domain names to protect the value of their corporate brands and reputation. Despite their efforts to protect their proprietary rights, unauthorized parties may copy aspects of their services or technology, obtain and use information, marks, or technology that they

regard as proprietary, or otherwise violate or infringe their intellectual property rights. In addition, it is possible that others could independently develop substantially equivalent intellectual property. If they do not effectively protect their intellectual property, or if others independently develop substantially equivalent intellectual property, their competitive position could be weakened. Effectively policing the unauthorized use of their services and technology is time-consuming and costly, and the steps taken by them may not prevent misappropriation of their technology or other proprietary assets. The efforts they have taken to protect our proprietary rights may not be sufficient or effective, and unauthorized parties may copy aspects of their services, use similar marks or domain names, or obtain and use information, marks, or technology that they regard as proprietary. They may have to litigate to enforce their intellectual property rights, to protect their trade secrets, or to determine the validity and scope of others' proprietary rights, which are sometimes not clear or may change. Litigation can be time consuming and expensive, and the outcome can be difficult to predict.

The Company's intellectual property is not currently patented, and they may not be able to obtain such intellectual property rights. Their ability to obtain protection for their intellectual property (whether through patent, trademark, copyright, or other IP right) is uncertain due to a number of factors, including that the Company may not have been the first to make the inventions. The Company have not conducted any formal analysis of the "prior art" in their technology, and the existence of any such prior art would bring the novelty of their technologies into question and could cause the pending patent applications to be rejected. Further, changes in U.S. and foreign intellectual property law may also impact their ability to successfully prosecute their IP applications. For example, the United States Congress and other foreign legislative bodies may amend their respective IP laws in a manner that makes obtaining IP more difficult or costly. Courts may also render decisions that alter the application of IP laws and detrimentally affect their ability to obtain such protection. Even if the Company is able to successfully register IP, this intellectual property may not provide meaningful protection or commercial advantage. Such IP may not be broad enough to prevent others from developing technologies that are similar or that achieve similar results to theirs. It is also possible that the intellectual property rights of others will bar the Company from licensing their technology and bar them or their customer licensees from exploiting any patents that issue from our pending applications. Finally, in addition to those who may claim priority, any patents that issue from our applications may also be challenged by their competitors on the basis that they are otherwise invalid or unenforceable.

We must correctly predict, identify, and interpret changes in consumer preferences and demand, offer new products to meet those changes, and respond to competitive innovation. Consumer preferences for our products change continually. Our success depends on our ability to predict, identify, and interpret the tastes and habits of consumers and to offer products that appeal to consumer preferences. If we do not offer products that appeal to consumers, our sales and market share will decrease. We must distinguish between short-term fads, mid-term trends, and long-term changes in consumer preferences. If we do not accurately predict which shifts in consumer preferences will be long-term, or if we fail to introduce new and improved products to satisfy those preferences, our sales could decline. In addition, because of our varied customer base, we must offer an array of products that satisfy the broad spectrum of consumer preferences. If we fail to expand our product offerings successfully across product categories, or if we do not rapidly develop products in faster growing and more profitable categories, demand for our products could decrease, which could materially and adversely affect our product sales, financial condition, and results of operations. In addition, achieving growth depends on our successful development, introduction, and marketing of innovative new products and line extensions. Successful innovation depends on our ability to correctly anticipate customer and consumer acceptance, to obtain, protect and maintain necessary intellectual property rights, and to avoid infringing the intellectual property rights of others and failure to do so could compromise our competitive position and adversely impact our business

Manufacturing or design defects, unanticipated use of our products, or inadequate disclosure of risks relating to the use of the products can lead to injury or other adverse events. These events could lead to recalls or safety alerts relating to our products (either voluntary or required by governmental authorities) and could result, in certain cases, in the removal of a product from the market. Any recall could result in significant costs as well as negative publicity that could reduce demand for our products. Personal injuries relating to the use of our products can also result in product liability claims being brought against us. In some circumstances, such adverse events could also cause delays in new product approvals. Similarly, negligence in performing our services can lead to injury or other adverse events.

The Company's business model is capital intensive. The amount of capital the Company is attempting to raise in this Offering is not enough to sustain the Company's current business plan. In order to achieve the Company's near and long-term goals, the Company will need to procure funds in addition to the amount raised in the Offering. There is no guarantee the Company will be able to raise such funds on acceptable terms or at all. If the Company are not able to raise sufficient capital in the future, it will not be able to execute its business plan, its continued operations will be in

jeopardy and it may be forced to cease operations and sell or otherwise transfer all or substantially all of its remaining assets, which could cause a Purchaser to lose all or a portion of his or her investment.

The consolidation of retail customers could adversely affect us. Retail customers in our major markets may consolidate, resulting in fewer customers for our business. Consolidation also produces larger retail customers that may seek to leverage their position to improve their profitability by demanding improved efficiency, lower pricing, increased promotional programs, or specifically tailored products. In addition, larger retailers have the scale to develop supply chains that permit them to operate with reduced inventories or to develop and market their own white-label brands. Retail consolidation and increasing retailer power could adversely affect our product sales and results of operations. Retail consolidation also increases the risk that adverse changes in our customers' business operations or financial performance will have a corresponding material and adverse effect on us. For example, if our customers cannot access sufficient funds or financing, then they may delay, decrease, or cancel purchases of our products, or delay or fail to pay us for previous purchases, which could materially and adversely affect our product sales, financial condition, and operating results.

We plan to implement new lines of business or offer new products and services within existing lines of business. There are substantial risks and uncertainties associated with these efforts, particularly in instances where the markets are not fully developed. In developing and marketing new lines of business and/or new products and services, we may invest significant time and resources. Initial timetables for the introduction and development of new lines of business and/or new products or services may not be achieved and price and profitability targets may not prove feasible. We may not be successful in introducing new products and services in response to industry trends or developments in technology, or those new products may not achieve market acceptance. As a result, we could lose business, be forced to price products and services on less advantageous terms to retain or attract clients, or be subject to cost increases. As a result, our business, financial condition or results of operations may be adversely affected.

The development and commercialization of the Company's products and services are highly competitive. It faces competition with respect to any products and services that it may seek to develop or commercialize in the future. Its competitors include major companies worldwide. The market is an emerging industry where new competitors are entering the market frequently. Many of the Company's competitors have significantly greater financial, technical and human resources and may have superior expertise in research and development and marketing approved services and thus may be better equipped than the Company to develop and commercialize services. These competitors also compete with the Company in recruiting and retaining qualified personnel and acquiring technologies. Smaller or early stage companies may also prove to be significant competitors, particularly through collaborative arrangements with large and established companies. Accordingly, the Company's competitors may commercialize products more rapidly or effectively than the Company is able to, which would adversely affect its competitive position, the likelihood that its services will achieve initial market acceptance and its ability to generate meaningful additional revenues from its products and services.

The amount of capital the Company is attempting to raise in this Offering is not enough to sustain the Company's current business plan. In order to achieve the Company's near and long-term goals, the Company will need to procure funds in addition to the amount raised in the Offering. There is no guarantee the Company will be able to raise such funds on acceptable terms or at all. If the Company is not able to raise sufficient capital in the future, the Company will not be able to execute its business plan, its continued operations will be in jeopardy and it may be forced to cease operations and sell or otherwise transfer all or substantially all of its remaining assets, which could cause a Purchaser to lose all or a portion of his or her investment.

Maintaining, extending and expanding our reputation and brand image are essential to our business success. We seek to maintain, extend, and expand our brand image through marketing investments, including advertising and consumer promotions, and product innovation. Increasing attention on marketing could adversely affect our brand image. It could also lead to stricter regulations and greater scrutiny of marketing practices. Existing or increased legal or regulatory restrictions on our advertising, consumer promotions and marketing, or our response to those restrictions, could limit our efforts to maintain, extend and expand our brands. Moreover, adverse publicity about regulatory or legal action against us could damage our reputation and brand image, undermine our customers' confidence and reduce long-term demand for our products, even if the regulatory or legal action is unfounded or not material to our operations. In addition, our success in maintaining, extending, and expanding our brand image depends on our ability to adapt to a rapidly changing media environment. We increasingly rely on social media and online dissemination of advertising campaigns. The growing use of social and digital media increases the speed and extent that information or misinformation and opinions can be shared. Negative posts or comments about us, our brands or our products on social or digital media, whether or not valid, could seriously damage our brands and reputation. If we do not establish,

maintain, extend and expand our brand image, then our product sales, financial condition and results of operations could be adversely affected.

The Company may be unable to maintain, promote, and grow its brand through marketing and communications strategies. It may prove difficult for the Company to dramatically increase the number of customers that it serves or to establish itself as a well-known brand in the competitive space. Additionally, the product may be in a market where customers will not have brand loyalty.

The Company's cash position is relatively weak. The Company currently has only \$175,789.43 in cash balances as of July 31, 2019. The Company believes that it is able to continue extracting cash from sales to extend its runway. The Company could be harmed if it is unable to meet its cash demands, and the Company may not be able to continue operations if they are not able to raise additional funds.

The Company has outstanding liabilities. The Company owes approximately \$120,000 in current liabilities.

We currently obtain components from single or limited sources, and are subject to significant supply and pricing risks. Many components, including those that are available from multiple sources, are at times subject to industry-wide shortages and significant commodity pricing fluctuations. While the Company has entered into agreements for the supply of many components, there can be no assurance that we will be able to extend or renew these agreements on similar terms, or at all. A number of suppliers of components may suffer from poor financial conditions, which can lead to business failure for the supplier or consolidation within a particular industry, further limiting our ability to obtain sufficient quantities of components. The follow-on effects from global economic conditions on our suppliers, also could affect our ability to obtain components. Therefore, we remain subject to significant risks of supply shortages and price increases.

We must acquire or develop new products, evolve existing ones, address any defects or errors, and adapt to technology change. Technical developments, client requirements, programming languages, and industry standards change frequently in our markets. As a result, success in current markets and new markets will depend upon our ability to enhance current products, address any product defects or errors, acquire or develop and introduce new products that meet client needs, keep pace with technology changes, respond to competitive products, and achieve market acceptance. Product development requires substantial investments for research, refinement, and testing. We may not have sufficient resources to make necessary product development investments. We may experience technical or other difficulties that will delay or prevent the successful development, introduction, or implementation of new or enhanced products. We may also experience technical or other difficulties in the integration of acquired technologies into our existing platform and applications. Inability to introduce or implement new or enhanced products in a timely manner could result in loss of market share if competitors are able to provide solutions to meet customer needs before we do, give rise to unanticipated expenses related to further development or modification of acquired technologies as a result of integration issues, and adversely affect future performance.

The Company is subject to rapid technological change and dependence on new product development. Their industry is characterized by rapid and significant technological developments, frequent new product introductions and enhancements, continually evolving business expectations and swift changes. To compete effectively in such markets, the Company must continually improve and enhance its products and services and develop new technologies and services that incorporate technological advances, satisfy increasing customer expectations and compete effectively on the basis of performance and price. Their success will also depend substantially upon our ability to anticipate, and to adapt our products and services to our collaborative partner's preferences. There can be no assurance that technological developments will not render some of our products and services obsolete, or that they will be able to respond with improved or new products, services, and technology that satisfy evolving customers' expectations. Failure to acquire, develop or introduce new products, services, and enhancements in a timely manner could have an adverse effect on their business and results of operations. Also, to the extent one or more of their competitors introduces products and services that better address a customer's needs, their business would be adversely affected.

The Company does not have an employment contract in place with Brian Gannon, the CEO. Employment agreements typically provide protections to the Company in the event of the employee's departure, specifically addressing who is entitled to any intellectual property created or developed by those employees in the course of their employment and covering topics such as non-competition and non-solicitation. As a result, if Brian Gannon were to leave LOOP, the Company might not have any ability to prevent his direct competition, or have any legal right to intellectual property created during his employment. There is no guarantee that an employment agreement will be entered into.

Risks Related to the Securities

The Convertible Notes will not be freely tradable until one year from the initial purchase date. Although the Convertible Notes may be tradable under federal securities law, state securities regulations may apply and each Purchaser should consult with his or her attorney. You should be aware of the long-term nature of this investment. There is not now and likely will not be a public market for the Convertible Notes. Because the Convertible Notes have not been registered under the 1933 Act or under the securities laws of any state or non-United States jurisdiction, the Convertible Notes have transfer restrictions under Rule 501 of Regulation CF. It is not currently contemplated that registration under the 1933 Act or other securities laws will be effected. Limitations on the transfer of the Convertible Notes may also adversely affect the price that you might be able to obtain for the Convertible Notes in a private sale. Purchasers should be aware of the long-term nature of their investment in the Company. Each Purchaser in this Offering will be required to represent that it is purchasing the Securities for its own account, for investment purposes and not with a view to resale or distribution thereof.

We are selling convertible notes that will convert into shares or result in payment in limited circumstances. These notes only convert or result in payment in limited circumstances. If the Convertible Notes reach their maturity date, investors will receive payment equal to the total of their purchase price plus outstanding accrued interest. If there is a merger, buyout or other corporate transaction that occurs before a qualified equity financing, investors will receive a payment equal to 2x their purchase price, plus accrued unpaid interest. If there is a qualified equity financing (an initial public offering registered under the 1933 Act or a financing using preferred shares), the notes will convert into a yet-to-be-determined class of preferred stock. If the notes convert due to a qualified equity financing, the notes will convert at a discount of 10%, or based on a \$8,500,000 valuation cap. This means that investors would be rewarded for taking on early risk compared to later investors. Outside investors at the time of conversion, if any, might value the Company at an amount well below the \$8,500,000 valuation cap, so you should not view the \$8,500,000 as being an indication of the Company's value.

We have not assessed the tax implications of using the Convertible Note. The Convertible Note is a type of debt security. As such, there has been inconsistent treatment under state and federal tax law as to whether securities like the Convertible Note can be considered a debt of the Company, or the issuance of equity. Investors should consult their tax advisers.

The Convertible Note contains dispute resolution provisions which limit your ability to bring class action lawsuits or seek remedy on a class basis. By purchasing a Convertible Note this Offering, you agree to be bound by the dispute resolution provisions found in Section 6 of the Convertible Note. Those provisions apply to claims regarding this Offering, the Convertible Notes and possibly the securities into which the Convertible Note are convertible. Under those provisions, disputes under the Convertible Note will be resolved in arbitration conducted in Delaware. Further, those provisions may limit your ability to bring class action lawsuits or similarly seek remedy on a class basis.

You may have limited rights. The Company has not yet authorized preferred stock, and there is no way to know what voting rights those securities will have. In addition, as an investor in the Regulation CF offering you will be considered a Non-Major Investor (as defined below) under the terms of the notes offered, and therefore, you have more limited information rights.

You will be bound by an investor proxy agreement which limits your voting rights. As a result of purchasing the notes, all Non-Major Investors (including all investors investing under Regulation CF) will be bound by an investor proxy agreement. This agreement will limit your voting rights and at a later time may require you to convert your future preferred shares into common shares without your consent. Non-Major Investors will be bound by this agreement, unless Non-Major Investors holding a majority of the principal amount outstanding of the Convertible Notes (or majority of the shares of the preferred equity the notes will convert into) held by Non-Major Investors vote to terminate the agreement.

A majority of the Company is owned by a small number of owners. Prior to the Offering, the Company's current owners of 20% or more of the Company's outstanding voting securities beneficially own up to 31% of the Company's voting securities. Subject to any fiduciary duties owed to our other owners or investors under Delaware law, these owners may be able to exercise significant influence over matters requiring owner approval, including the election of directors or managers and approval of significant Company transactions, and will have significant control over the Company's management and policies. Some of these persons may have interests that are different from yours. For example, these owners may support proposals and actions with which you may disagree. The concentration of ownership could delay or prevent a change in control of the Company or otherwise discourage a potential acquirer from attempting to obtain control of the Company, which in turn could reduce the price potential investors are willing to pay for the Company. In addition, these owners could use their voting influence to maintain the Company's existing

management, delay or prevent changes in control of the Company, or support or reject other management and board proposals that are subject to owner approval.

BUSINESS

Families are becoming disconnected.

There are 127mm households in the US, but families are spread out across different cities, relying on different social platforms, disjoint phone platforms and varying technology skill levels. This fragmentation leaves families frustrated and disconnected. In addition, we are entering a new phase of privacy - 52.2% of users are not confident about their privacy on the internet and families are relying less and less on big public social networks for their family communication.

Loop brings families back together.

Loop is a new family communication platform that combines the convenience of a private sharing app, and the simplicity of a home display. It's a private, closed system without ads, and only includes the people you care about the most.

Business Plan

Loop App

Customers use the app to push content and to view it on their phone. Content is organized in “channels”, which can be a child, entire family, vacations, artwork - anything. Users invite family or a close circle of friends to the channels to participate.

Loop Display Hardware

The channels are streamed instantly into the Loop display. It is a frictionless experience that brings back the communal family experience of televisions and radios from the 50's and 60's. Loop can stream pictures, videos or even live video chat.

As the platform and utility grows within a family, more people buy the Loop display and download the app creating a powerful network effect.

Business Model: Hardware + Recurring Monthly Subscription

We sell hardware plus a monthly subscription service, similar to Ring Doorbell. The average price of the hardware is \$225/unit with discounts for bundles. We also have a \$3/mo optional subscription service providing users with unlimited cloud storage and premium features.

The app is free and users can share the app with multiple family members, with or without the Loop display, allowing the platform to grow faster than the hardware.

We make up to 40% gross margin on the full-price hardware and an estimated 70-80% gross margin on the subscription service. In the future the hardware margin will improve to 50+% with economies of scale.

Defensible position and competitive advantage through network effects

As customers curate content into the Loop system, the product becomes sticky. As users invite more family members, they upload more content and which creates network effects - one of the most powerful competitive forces in technology companies. Loop has 80% retention on customers who have invited 3 or more people.

Backed by Top investors and Advisors

Our lead investor is Resolute Ventures, who has backed successes such as Clutter (Series A/B Sequoia capital, recent \$250M Softbank investment), Greenhouse (Social Capital Series A, Series B Benchmark), Bark (August Capital), Sunrise (acquired by MSFT) and Bitium (acquired by Google), Orbitera (Acquired by Google). They have invested in all our financing rounds.

In addition we have legendary Angel investor Jason Calacanis who has backed Uber, Thumbtack and Robinhood (\$7.6B valuation).

Opportunity to build a global brand synonymous with “Family”

The opportunity for Loop is to not only build a successful hardware brand, but to also create a new family focused platform on the level of Snapchat or Slack. With the funds raised in this round we aim to accelerate our growth and become a trusted tool for families around the world.

The Company's Products and/or Services

Product / Service	Description	Current Market
Consumer Electronics	Loop is a family communication device for the home that allows you to seamlessly share video, photos, and video chat.	Individuals that wish to use family communication services with greater privacy than current social media offerings

Competition

The markets in which our products are sold are highly competitive. Our products compete against similar products of many large and small companies, including well-known global competitors. In many of the markets and industry segments in which we sell our products, we compete against other branded products as well as retailers' private-label brands. Product quality, performance, value and packaging are also important differentiating factors.

Customer Base

Our customers are individuals using family communication services.

Litigation

None

USE OF PROCEEDS

We will adjust roles and tasks based on the net proceeds of the Offering. We plan to use these proceeds as described below.

Offering Expenses

The use of proceeds for expenses related to the Combined Offering is as follows:

- If the Company raises the Target Amount, it will use 47.50% of the proceeds, or \$11,750, towards offering expenses;
- If the Company raises the Closing Amount, it will use 7.88% of the proceeds, or \$205,000, towards offering expenses; and
- If the Company raises the Maximum Amount, it will use 8.4% of the proceeds, or \$90,250, towards offering expenses

The proceeds remaining after meeting offering expenses will be used as follows:

Use of Proceeds	% if Target Amount Raised	% if Closing Amount Raised	% if Maximum Amount Raised
Android App	5%	5%	5%
Customer Service	5%	5%	5%
Subscription Service	10%	10%	10%
Marketing	25%	25%	25%
Software Engineering	25%	25%	25%
Hardware Expenses	15%	15%	15%
Office and GA	15%	15%	15%

The above table of the anticipated use of proceeds is not binding on the Company and is merely a description of its current intentions. We reserve the right to change the above use of proceeds if management believes it is in the best interests of the Company.

DIRECTORS, OFFICERS, AND MANAGERS

The directors, officers, and managers of the Company are listed below along with all positions and offices held at the Company and their principal occupation and employment responsibilities for the past three (3) years.

Name	Positions and Offices Held at the Company	Principal Occupation and Employment Responsibilities for the Last Three (3) Years
Brian Gannon	CEO and Director	Loop, CEO, October 2014 - present: Product management, project management, fundraising, managing operations and marketing.
Brad O'Neill	Director	Non-executive Director April 2017 - present

Indemnification

Indemnification is authorized by the Company to managers, officers or controlling persons acting in their professional capacity pursuant to Delaware law. Indemnification includes expenses such as attorney's fees and, in certain circumstances, judgments, fines and settlement amounts actually paid or incurred in connection with actual or threatened actions, suits or proceedings involving such person, except in certain circumstances where a person is adjudged to be guilty of gross negligence or willful misconduct, unless a court of competent jurisdiction determines that such indemnification is fair and reasonable under the circumstances.

Employees

The Company currently has 3 employees in California.

CAPITALIZATION AND OWNERSHIP

Capitalization

The Company has issued the following outstanding Securities:

Type of security	Amount outstanding	Voting rights	How this security may limit, dilute, or qualify the Securities issues pursuant to this Offering	Percentage ownership of the Company by the holders of such securities prior to the Offering	Other material terms
Common Stock	6,748,171	N/A	N/A	53.6317%	
Series Seed Preferred	5,834,262	Yes	N/A	46.3683%	Price Per Share: \$0.5387
Options and RSU's Outstanding Under 2014 EIP	3,532,043	N/A	To the extent converted	N/A	
Convertible Note	\$3.75M	N/A	To the extent converted	N/A	\$8.5M cap, 10% discount, 3% interest, maturity at August 27, 2020
Convertible Note	\$100,000	N/A	To the extent converted	N/A	5% interest, \$1,666,667 Cap,

					maturity date Feb 29, 2020
--	--	--	--	--	----------------------------

Ownership

A majority of the Company is owned by one person. That person is Brian Gannon.

Below are the beneficial owners of 20% percent or more of the Company's outstanding voting equity securities, calculated on the basis of voting power, are listed along with the amount they own.

Name	Number and type/class of security held	Percentage ownership
Brian Gannon	Common Stock	31%

FINANCIAL INFORMATION

Please see the financial information listed on the cover page of this Form C/A and attached hereto in addition to the following information. Financial statements are attached hereto as Exhibit B.

Operations

California Labs, Inc.(dba Loop (the "Company") is a C-corporation incorporated in Delaware as of 03/07/2014 and is headquartered in San Francisco, CA. Loop makes a hardware and software tool to help families share pictures and communicate. We make revenue by selling a Loop home hardware display device as well as a monthly subscription for cloud backup and other services.

The Company was incorporated in DE under the name Wink Labs, Inc. on 3/7/2014 and was renamed California Labs, Inc. on 1/12/2015.

Liquidity and Capital Resources

The proceeds from the Offering are essential to our operations. We plan to use the proceeds as set forth above under "Use of Proceeds", which is an indispensable element of our business strategy. The Offering proceeds will have a beneficial effect on our liquidity, as we have approximately \$175,789.43 in cash on hand as of July 31, 2019 which will be augmented by the Offering proceeds and used to execute our business strategy.

The Company currently does not have any additional outside sources of capital other than the proceeds from the Combined Offerings.

Capital Expenditures and Other Obligations

The Company does not intend to make any material capital expenditures in the future.

Trends and Uncertainties

After reviewing the above discussion of the steps the Company intends to take, potential Purchasers should consider whether achievement of each step within the estimated time frame is realistic in their judgment. Potential Purchasers should also assess the consequences to the Company of any delays in taking these steps and whether the Company will need additional financing to accomplish them.

The financial statements are an important part of this Form C/A and should be reviewed in their entirety. The financial statements of the Company are attached hereto as Exhibit B.

Valuation

Before making an investment decision, you should carefully consider this valuation and the factors used to reach such valuation. Such valuation may not be accurate and you are encouraged to determine your own independent value of the Company prior to investing.

As discussed in "Dilution" below, the valuation will determine the amount by which the investor's stake is diluted immediately upon investment. An early-stage company typically sells its shares (or grants options over its shares) to its founders and early employees at a very low cash cost, because they are, in effect, putting their "sweat equity" into

the Company. When the Company seeks cash investments from outside investors, like you, the new investors typically pay a much larger sum for their shares than the founders or earlier investors, which means that the cash value of your stake is immediately diluted because each share of the same type is worth the same amount, and you paid more for your shares (or the notes convertible into shares) than earlier investors did for theirs.

There are several ways to value a company. None of them is perfect and all of them involve a certain amount of guesswork. The same method can produce a different valuation if used by a different person.

Liquidation Value - The amount for which the assets of the Company can be sold, minus the liabilities owed, e.g., the assets of a bakery include the cake mixers, ingredients, baking tins, etc. The liabilities of a bakery include the cost of rent or mortgage on the bakery. However, this value does not reflect the potential value of a business, e.g. the value of the secret recipe. The value for most startups lies in their potential, as many early stage companies do not have many assets (they probably need to raise funds through a securities offering in order to purchase some equipment).

Book Value - This is based on analysis of the Company’s financial statements, usually looking at the Company’s balance sheet as prepared by its accountants. However, the balance sheet only looks at costs (i.e. what was paid for the asset), and does not consider whether the asset has increased in value over time. In addition, some intangible assets, such as patents, trademarks or trade names, are very valuable but are not usually represented at their market value on the balance sheet.

Earnings Approach - This is based on what the investor will pay (the present value) for what the investor expects to obtain in the future (the future return), taking into account inflation, the lost opportunity to participate in other investments, the risk of not receiving the return. However, predictions of the future are uncertain and valuation of future returns is a best guess.

Different methods of valuation produce a different answer as to what your investment is worth. Typically liquidation value and book value will produce a lower valuation than the earnings approach. However, the earnings approach is also most likely to be risky as it is based on many assumptions about the future, while the liquidation value and book value are much more conservative.

Future investors (including people seeking to acquire the Company) may value the Company differently. They may use a different valuation method, or different assumptions about the Company’s business and its market. Different valuations may mean that the value assigned to your investment changes. It frequently happens that when a large institutional investor such as a venture capitalist makes an investment in a company, it values the Company at a lower price than the initial investors did. If this happens, the value of the investment will go down.

Previous Offerings of Securities

We have made the following issuances of securities within the last three years:

Previous Offering	Date of Previous Offering	Offering Exemption Relied Upon	Type of Securities Offered	Amount of Securities Sold	Use of Proceeds of the Previous Offering
Series Seed Preferred	January 2017	Regulation 506(b)	D, Preferred Stock	\$2M	SG&A
Convertible Note	March 2015	Regulation 506(b)	D, Convertible Debt	\$750K	SG&A

THE OFFERING AND THE SECURITIES

The Securities Offered in this Offering

The following description is a brief summary of the material terms of the Securities being offered and is qualified in its entirety by the terms contained in the Convertible Notes.

The Convertible Notes sold in this Offering will convert in the following circumstances:

- Once a "qualified equity financing" occurs (which is a preferred stock financing raising of not less than \$31,000,000), the notes thereafter will automatically convert into the shares of preferred stock sold in the qualified equity financing.
- If, prior to a change of control or the maturity date, the Company sells preferred stock in an equity financing that does not constitute a "qualified equity financing" (a "non-qualified financing"), then note holders shall have the option to convert their outstanding note balance into the preferred stock sold in the non-qualified financing.

The price at which the Convertible Notes sold in this Offering will convert will be:

- At a discount of 10% to the price in the qualified equity financing, subject to a \$8,500,000 valuation cap, if the conversion takes place due to a qualified equity financing; or
- If conversion takes place at the option of the holder due to a non-qualified equity financing, the same price as the price paid by investors in the non-qualified equity financing.

Until the earlier of conversion or payment, the Convertible Notes accrue an annual interest rate of 3%, compounded quarterly.

The securities into which the Convertible Notes in this Offering will convert will have more limited voting and information rights than those to be issued to Major Investors on conversion.

Our Target Amount for this Offering to investors under Regulation Crowdfunding is \$25,000.

Additionally, we have set a minimum Closing Amount of \$2,600,000 between our Combined Offerings under Regulation Crowdfunding and Regulation D, which we will need to meet before the Offering may close.

The minimum investment in this Offering is \$1,000. SeedInvest Auto Invest participants have a lower investment minimum in this offering of \$200. Investments of \$20,000 or greater will only be accepted through the Regulation D offering.

All Non-Major Investors of Convertible Notes will be bound by an investor proxy agreement. This agreement will limit your voting rights and at a later time may require you to convert your future preferred shares into common shares without your consent. Non-Major Investors will be bound by this agreement, unless Non-Major Investors holding a majority of the principal amount outstanding of the Convertible Notes (or majority of the shares of the preferred equity the notes will convert into) held by Non-Major Investors vote to terminate the agreement.

Securities Sold Pursuant to Regulation D

The Company is selling securities in a concurrent offering to accredited investors under Rule 506(c) under the 1933 Act at the same time as this Offering under Regulation Crowdfunding (together, the "Combined Offerings").

The Convertible Notes in the Regulation D offering convert under similar terms to the Convertible Notes in this offering. However, investors who invest \$50,000 or greater will be considered "Major Investors" under the Convertible Note. Major Investors will be entitled to greater information rights than Non-Major Investors in the Combined Offerings. In the future, Major Investors may also be entitled to greater voting rights than their non-major counterparts.

Dilution

Even once the Convertible Note convert into preferred or common equity securities, as applicable, the investor's stake in the Company could be diluted due to the Company issuing additional shares. In other words, when the Company issues more shares (or additional equity interests), the percentage of the Company that you own will go down, even though the value of the Company may go up. You will own a smaller piece of a larger company. This increase in number of shares outstanding could result from a stock offering (such as an initial public offering, another crowdfunding round, a venture capital round or angel investment), employees exercising stock options, or by conversion of certain instruments (e.g. convertible bonds, preferred shares or warrants) into stock.

If a company decides to issue more shares, an investor could experience value dilution, with each share being worth less than before, and control dilution, with the total percentage an investor owns being less than before. There may also be earnings dilution, with a reduction in the amount earned per share (though this typically occurs only if the company offers dividends, and most early stage companies are unlikely to offer dividends, preferring to invest any earnings into the company).

The type of dilution that hurts early-stage investors mostly occurs when a company sells more shares in a "down round," meaning at a lower valuation than in earlier offerings. An example of how this might occur is as follows (numbers are for illustrative purposes only):

- In June 2014 Jane invests \$20,000 for shares that represent 2% of a company valued at \$1 million.
- In December, the company is doing very well and sells \$5 million in shares to venture capitalists on a valuation (before the new investment) of \$10 million. Jane now owns only 1.3% of the company but her stake is worth \$200,000.
- In June 2015 the company has run into serious problems and in order to stay afloat it raises \$1 million at a valuation of only \$2 million (the "down round"). Jane now owns only 0.89% of the company and her stake is worth only \$26,660.

This type of dilution might also happen upon conversion of convertible notes into shares. Typically, the terms of convertible notes issued by early-stage companies provide that in the event of another round of financing, the holders of the convertible notes get to convert their notes into equity at a "discount" to the price paid by the new investors, i.e., they get more shares than the new investors would for the same price. Additionally, convertible notes may have a "price cap" on the conversion price, which effectively acts as a share price ceiling. Either way, the holders of the convertible notes get more shares for their money than new investors. In the event that the financing is a "down round" the holders of the convertible notes will dilute existing equity holders, and even more than the new investors do, because they get more shares for their money.

If you are making an investment expecting to own a certain percentage of the Company or expecting each share to hold a certain amount of value, it's important to realize how the value of those shares can decrease by actions taken by the Company. Dilution can make drastic changes to the value of each share, ownership percentage, voting control, and earnings per share.

Tax Matters

EACH PROSPECTIVE PURCHASER SHOULD CONSULT WITH HIS OWN TAX AND ERISA ADVISOR AS TO THE PARTICULAR CONSEQUENCES TO THE PURCHASER OF THE PURCHASE, OWNERSHIP AND SALE OF THE PURCHASER'S SECURITIES, AS WELL AS POSSIBLE CHANGES IN THE TAX LAWS.

Restrictions on Transfer

Any Securities sold pursuant to Regulation CF being offered may not be transferred by any Purchaser of such Securities during the one-year holding period beginning when the Securities were issued, unless such Securities are

transferred: 1) to the Company, 2) to an accredited investor, as defined by Rule 501(a) of Regulation D promulgated under the 1933 Act, 3) as part of an IPO or 4) to a member of the family of the Purchaser or the equivalent, to a trust controlled by the Purchaser, to a trust created for the benefit of a member of the family of the Purchaser or the equivalent, or in connection with the death or divorce of the Purchaser or other similar circumstances. "Member of the family" as used herein means a child, stepchild, grandchild, parent, stepparent, grandparent, spouse or spousal equivalent, sibling, mother/father/daughter/son/sister/brother-in-law, and includes adoptive relationships. Remember that although you may legally be able to transfer the Securities, you may not be able to find another party willing to purchase them.

In addition to the foregoing restrictions, prior to making any transfer of the Securities or any Securities into which they are convertible, such transferring Purchaser must either make such transfer pursuant to an effective registration statement filed with the SEC or provide the Company with an opinion of counsel stating that a registration statement is not necessary to effect such transfer.

Other Material Terms

The Company does not have the right to repurchase the Securities. The Securities do not have a stated return or liquidation preference.

Related Person Transactions

From time to time the Company may engage in transactions with related persons. Related persons are defined as any manager, director, or officer of the Company; any person who is the beneficial owner of 10 percent or more of the Company's outstanding voting equity securities, calculated on the basis of voting power; any promoter of the Company; any immediate family member of any of the foregoing persons or an entity controlled by any such person or persons.

The Company has conducted the following transactions with related persons:

None

Conflicts of Interest

The Company has engaged in the following transactions or relationships, which may give rise to a conflict of interest with the Company, its operations and its security holders: None.

SEEDINVEST INVESTMENT PROCESS

Making an Investment in the Company

How does investing work?

When you complete your investment on SeedInvest, your money will be transferred to an escrow account where an independent escrow agent will watch over your investment until it is accepted by the Company. Once the Company accepts your investment, and certain regulatory procedures are completed, your money will be transferred from the escrow account to the Company in exchange for your Convertible Note. At that point, you will be an investor in the Company.

SeedInvest Regulation CF rules regarding the investment process:

- Investors may cancel an investment commitment until 48 hours prior to the deadline identified in the issuer's Offering materials;
- The intermediary will notify investors when the target offering amount has been met;
- The Company is making concurrent offerings under both Regulation CF and Regulation D and unless the Company raises at least the target amount under the Regulation CF Offering and the closing amount under both offerings, it will not close this Offering;
- If an issuer reaches a target offering amount and the closing amount prior to the deadline identified in its offering materials, it may close the Offering early if it provides notice about the new Offering deadline at least five business days prior to such new Offering deadline;
- If there is a material change and an investor does not reconfirm his or her investment commitment, the investor's investment commitment will be cancelled and the committed funds will be returned;

- If an issuer does not reach both the target offering amount and the closing offering amount prior to the deadline identified in its offering materials, no Securities will be sold in the Offering, investment commitments will be cancelled and committed funds will be returned; and
- If an investor does not cancel an investment commitment before the 48-hour period prior to the Offering deadline, the funds will be released to the issuer upon closing of the Offering and the investor will receive Securities in exchange for his or her investment.

What will I need to complete my investment?

To make an investment you will need the following information readily available:

1. Personal information such as your current address and phone number
2. Employment and employer information
3. Net worth and income information
4. Social Security Number or government-issued identification
5. ABA bank routing number and checking account number

What is the difference between preferred equity and a convertible note?

Preferred equity is usually issued to outside investors and carries rights and conditions that are different from that of common stock. For example, preferred equity may include rights that prevent or minimize the effects of dilution or grants special privileges in situations when the Company is sold.

A convertible note is a unique form of debt that converts into equity, usually in conjunction with a future financing round. The investor effectively loans money to the Company with the expectation that they will receive equity in the Company in the future at a discounted price per share when the Company raises its next round of financing. To learn more about startup investment types, check out "How to Choose a Startup Investment" in the SeedInvest Academy.

How much can I invest?

An investor is limited in the amount that he or she may invest in a Regulation Crowdfunding Offering during any 12-month period:

- If either the annual income or the net worth of the investor is less than \$107,000, the investor is limited to the greater of \$2,000 or 5% of the lesser of his or her annual income or net worth.
- If the annual income and net worth of the investor are both equal to or greater than \$107,000, the investor is limited to 10% of the lesser of his or her annual income or net worth, to a maximum of \$107,000. Separately, the Company has set a minimum investment amount.

How can I (or the Company) cancel my investment?

For Offerings made under Regulation Crowdfunding, you may cancel your investment at any time up to 48 hours before a closing occurs or an earlier date set by the Company. You will be sent a reminder notification approximately five days before the closing or set date giving you an opportunity to cancel your investment if you had not already done so. Once a closing occurs, and if you have not cancelled your investment, you will receive an email notifying you that your Securities have been issued. If you have already funded your investment, let SeedInvest know by emailing cancellations@seedinvest.com. Please include your name, the Company's name, the amount, the investment number, and the date you made your investment.

After My Investment

What is my ongoing relationship with the Company?

You are an investor in the Company, you do own securities after all! But more importantly, companies that have raised money via Regulation Crowdfunding must file information with the SEC and post it on their website on an annual basis. Receiving regular company updates is important to keep investors educated and informed about the progress of the Company and their investments. This annual report includes information similar to the Company's initial Form C filing and key information that a company will want to share with its investors to foster a dynamic and healthy relationship.

In certain circumstances a company may terminate its ongoing reporting requirements if:

- (1) the Company is required to file reports under Section 13(a) or Section 15(d) of the Exchange Act;
- (2) the Company has filed at least three annual reports pursuant to Regulation CF and has total assets that do not exceed \$10,000,000;
- (3) the Company has filed at least one annual report pursuant to Regulation CF and has fewer than 300 holders of record;

- (4) the Company or another party repurchases all of the Securities issued in reliance on Section 4(a)(6) of the 1933 Act, including any payment in full of debt securities or any complete redemption of redeemable securities; or
- (5) the Company liquidates or dissolves its business in accordance with state law.

However, regardless of whether a company has terminated its ongoing reporting requirements per SEC rules, SeedInvest works with all companies on its platform to ensure that investors are provided quarterly updates. These quarterly reports will include information such as: (i) quarterly net sales, (ii) quarterly change in cash and cash on hand, (iii) material updates on the business, (iv) fundraising updates (any plans for next round, current round status, etc.), and (v) any notable press and news.

How do I keep track of this investment?

You can return to SeedInvest at any time to view your portfolio of investment and obtain a summary statement. In addition to monthly account statements, you may also receive periodic updates from the Company about its business.

Can I get rid of my Securities after buying them?

Securities purchased through a Regulation Crowdfunding Offering are not freely transferable for one year after the date of purchase, except in the case where they are transferred:

1. To the Company that sold the Securities
2. To an accredited investor
3. As part of an Offering registered with the SEC (think IPO)
4. To a member of the family of the purchaser or the equivalent, to a trust controlled by the purchaser, to a trust created for the benefit of a member of the family of the purchaser, or in connection with the death or divorce of the purchaser

Regardless, after the one year holding period has expired, you should not plan on being able to readily transfer and/or sell your security. Currently, there is no market or liquidity for these Securities and the Company does not have any plans to list these Securities on an exchange or other secondary market. At some point the Company may choose to do so, but until then you should plan to hold your investment for a significant period of time before a "liquidation event" occurs.

SIGNATURE

Pursuant to the requirements of Sections 4(a)(6) and 4A of the Securities Act of 1933 and Regulation Crowdfunding (§ 227.100 et seq.), the issuer certifies that it has reasonable grounds to believe that it meets all of the requirements for filing on Form C/A and has duly caused this Form to be signed on its behalf by the duly authorized undersigned.

Instructions.

1. The form shall be signed by the issuer, its principal executive officer or officers, its principal financial officer, its controller or principal accounting officer and at least a majority of the board of directors or persons performing similar functions.
2. The name of each person signing the form shall be typed or printed beneath the signature.

Intentional misstatements or omissions of facts constitute federal criminal violations. See 18 U.S.C. 1001.
